**INSTITUTION OF FORESTERS KERALA**

**COMPREHENSIVE STUDY  
ON  
SACRED GROVES  
IN  
KERALA**

*Report No: 5*

*Alappuzha District*

*Submitted to*  
**CHAIRMAN**  
*Kerala Forest Development Fund*  
**Kerala Forest and Wildlife Department**

**February 2018**

## **PREFACE**

**Institution of Foresters Kerala** (IFK) is a society registered in the year 1987 under the Travancore Literary, Science and Charitable Societies Act 1955 with its Central office at Thiruvananthapuram. Later it has established two Regional Chapters one at Thrissur and another at Kozhikode. One of the objectives of IFK is to undertake studies on topics useful in Forest Management. Accordingly the Project-“A Comprehensive Study on the Socio-economic and Cultural aspects of Sacred Groves in Kerala” was prepared and submitted to Kerala Forest Department in June 2012. This project was examined and discussed by the Kerala Forest Development Fund Research Committee in its meeting held on 18<sup>th</sup> August 2012 and was approved for implementation. The project envisages a detailed study of Sacred Groves (SGs) in all the districts of Kerala one by one.

To start with Thiruvananthapuram District was allotted and IFK completed the study and submitted the report in November 2013. Subsequently districts such as Kollam, Thrissur and Kozhikode were allotted. The study was completed and all the reports in respect of the three districts have been submitted. This is the fifth report now being submitted. The KFDF Research Committee which met on 16<sup>th</sup> Nov. 2013 allotted Alappuzha District for the study and the MOU was executed on 10-01-2014 (vide-No. A 10(A) 18400/2012 dt-08-01-14). On completing the field work the number of sacred groves was found to be 2242 against the earlier expected number -around 100.

IFK record its immense gratitude to Kerala Forest Department in entrusting this glorious task with it. We also thank Shri. S.C.Joshi IFS (PCCF-D&PM) and Sri. L.K.Vashney IFS, Addl.PCCF and Chairman KFDF for their guidance in the beginning. Our thanks are due to Sri. P.K.Pathak IFS (Addl.PCCF), Sri. K.J.Varghese IFS (PCCF) and Sri. Rajan Sehgal IFS (APCCF) who subsequently took over the realm of affairs till the completion of this work. Our thanks are due to the members of the KFDF Research Committee for their positive attitude in IFK's activities. Finally we express our thanks in no small measure to other officers and staff at Forest Headquarters, particularly Shri. Santhosh K John IFS (DCF Development) and his assisting team in extending fair approach to IFK to make this activity hassle free.

This study report may serve as the valid document on the status and distribution of Sacred Groves in the district. It is our modest expectation that it forms the basis for future planning on the conservation of this precious eco system

We have taken all possible efforts to collect data exhaustively and prepare this report. Still if any one points out mistake of facts we will examine and correct if essential. We welcome comments and it will be our pleasure to clarify any of the details included in this report to all those concerned.

28-2-2018

**M.S.Nair**

(President)

**Institution of Foresters Kerala**

## ACKNOWLEDGEMENT FOR SERVICES RENDERED

This project report is the result of the sincere and hard work contributed by a number of members of IFK and a few others from outside. The nature of work contributed by them is acknowledged as below:-

Field Enumeration & Data Collection	<b>Sri. E.B.Chandra Babu</b> , Section Forest Officer (Rtd) <b>Sri. Jamaludeenkutty</b> , Section Forest Officer(Rtd) <b>Sri. C.R.Jagajeevan</b> Section Forest Officer (Rtd) <b>Sri. C.Vijayan</b> , Section Forest Officer (Retd)
Field supervision & Field coordination	<b>Sri. K.V.Ravikumar</b> IFS(Rtd)
Flora identification	<b>Dr. N. Sasidharan</b> EmeritusProfessor,Botany.KFRI
Field checking	<b>Sri. M.S.Nair</b> <b>Sri. Patric Gomez</b> <b>Sri. B.R.Vijayakumar</b> <b>Sri. S.Janardanan</b>
Data entry	<b>M/s. Jaicom</b> Facility Centre
Verification of data entry & Compilation	<b>Sri. M.S.Nair</b> , <b>Sri. PatricGomez</b> , & <b>Sri. S.Janardhanan</b> ,
<b>REPORT PREPARATION</b>	
Introduction-Chapter .I	<b>Sri. M.S.Nair</b>
Review of Literature	<b>Sri. M.S.Nair&amp; Sri. C.K.Karunakaran</b>
Result of Study-Chapter III	<b>Sri. PatricGomez</b>
SG wise list of plants & frequency distribution.	<b>Dr. N.Sasidharan</b>
Socio-Cultural aspects	<b>Sri. Patric Gomez</b>
All other Chapters	<b>Sri. M.S.Nair</b>
Photographs contributed	<b>Sri. M.S.Nair</b> <b>Dr. N.Sasidharan&amp;Sri. E.B. Chandra Babu</b>
Editing & Finalization of the Report	<b>Sri. M.S. Nair</b> (Principal Investigator of the project) <b>Sri. Patric Gomez</b> (Chief Coordinator of the project) <b>Sri. S. Janardanan</b>
Myths & Legends consultation	<b>Sri. Jayasankar-Renowned Author of Temples in Kerala.</b>

Also, I take this opportunity to sincerely acknowledge the cooperation, contributions and valuable suggestions given by the Executive Committee members of IFK from time to time to carry out this task constraint free.

28/2/2018

## **EXECUTIVE SUMMARY**

Name of Project : **A Comprehensive Study On The Socio-Economic & Cultural Aspects of Sacred Groves In Kerala**

**Report No 5.** : ***Alappuzha District***

### **General**

Sanctioning Authority : Addl.Principal Chief Conservator  
(Finance,Budget& -Audit)  
Chairman, KFDF Research Committee.

Implementing Agency : Institution of Foresters Kerala

Principal Investigator : M. S. NAIR

Date of Agreement : Aug.2014

Area of Study : All six taluks of Alappuzha District.

Geographycal extent of the District : 1414 sq.km

### **PART I**

#### **CHAPTER I : INTRODUCTION**

##### **Objectives**

- Arrive at an exhaustive list of Sacred Groves in the District.
- Detailed study of flora and fauna
- Documentation of geographical and legal details.
- Study on Socio-economic and cultural aspects
- Conduct study on ecological status

##### **Uniqueness**

- Exhaustive inventory of Sacred groves.
- Creation of a databank on geographical and legal status of sacred groves.
- Detailed study on flora.
- Documentation of Socio-economic and Cultural aspects.
- Mapping SGs with Id numbers.

## Methodology

Described data collection and documentation in the main report.

## CHAPTER II : REVIEW OF LITERATURE

Definition, global scenario, attitude of different religions in the world towards sacred groves, Indian scenario, number of SGs, flora and fauna documented earlier etc.

## CHAPTER III : RESULTS OF STUDY

Total number of SGs district wise, Taluk wise, distribution under different size categories.management details.

### ALAPPUZHA DISTRICT -NUMBER AND AREA OF SACRED GROVES.

Sl. No.	Name of Taluk	No. of Sacred Groves	Extent (Cents)
1	Cherthala	877 Nos.	129.33 Acres
2	Ambalappuzha	255 Nos.	37.94 “
3	Karthikappally	433 Nos	116.7 „
4	Mavelikkara	486Nos	127.44 „
5	Chengannur	126Nos	33.57 „
6	Kuttanad	65 Nos	6.08 “
	<b>Total</b>	<b>2242</b>	<b>451.84Acres</b> <b>Ha. 182.93</b>

### Management

Five main categories identified-

- i. Government- 1
- ii. DevaswamBoard.-45
- iii. Public trust& Local Committees. -94
- iv. Private- - Kudumbakavu&KudumbaTrust,- 2102

### **Id Numbers to Sacred Groves.**

Id numbers have been provided taluk wise-

Cherthala	ALPY/Ctla	1 to 877
Ambalapuzha	ALPY/Abpa	1 to 255
Karthikapally	ALPY/Kply	1 to 433
Mavelikkara	ALPY/Mvka	1 to 486
Chengannur	ALPY/Cgnr	1 to 126
Kuttanad	ALPY/Ktnd	1 to 65

All the SGs have been given serial numbers coming in each taluk.

A Statement giving all other information including management category has been attached in the report talukwise.

Mapping-Separate map for each taluk has been prepared giving the location and Id numbers of SGs village wise based on GPS readings taken at each SG.

### **CHAPTER IV : COMPOSITION OF VEGETATION.**

- i. Rare Species seen in the SGs have been listed out-noting conservation status

Trees-33, Shrubs-16 , Climbers-28.Herbs-6

- ii. Frequency distribution of species brought out.

### **Detailed Study of Selected Sacred Groves.**

In all 32 SGs falling in the three regions low land-middle land and high land-have been inspectedand prepared by an expert on Botany and Taxonomy and the important species identified are tabulated SG wise .

### **CHAPTER V: ECOLOGICAL STATUS**

*Vegetation-* Plant diversity with rare Invasive species, Keystone species, Natural regeneration, nature of occurrence of species region wise,

*Soil condition-* Result of soil tests and analysis, soil and water conservation discussed.

*Faunal significance-* Useful and harmful role of bats, termites,peafowl etc.as could be collected with their habitats.

*Moisture conservation-*Extent of wet land contributed by numerous ponds within SGs.

## CHAPTER VI : SOCIAL DIMENSIONS OF SACRED GROVES

Sacred Groves falling in different regions totaling 125 numbers were selected and the social conditions in relation to the Sacred Groves have been studied. Mainly four stake holders have been identified such as, i-Local people, ii. Custodians, iii, Priest hood, iv. Shop keepers and vendors. Representatives belonging to all the above categories have been contacted with suitable questionnaire and analyzed their views.

Study revealed that the network of social system centered around sacred groves built on faith on God, customs, harmony and flow of income is comparatively high as seen in other districts.. It is estimated that the following is the minimum effect on socio-economic condition annually. For the purpose of assessing Socio-economic condition SGs have been categorized into-

- Under Devaswam Board,
- Public Trusts & Local Committee,
- Those attached with private temples,
- Privately owned and
- Special cases with rituals on large scale .

### **The Economic Status for a whole year in the District.**

Employment - Rs.10 lakhs Man days.

Remuneration-Rs. 44.4crore

Total amount generated under various sources-- Rs. 55 crore.

## CHAPTER VII : SOCIO-CULTURAL ASPECTS OF SACRED GROVES

Though the number of folk art forms are very limited compared to other districts the volume is more on account of the huge number of sacred groves. Various practices based on belief are described in the following headings:-

- Concept of sacred groves,
- Gender of deity,
- Worship pattern,
- Folk songs like pulluvanpattu,
- Folk arts like kalamaezhuthu etc.

## **CHAPTER VIII : MYTHS & LEGENDS.**

Prepared based on information narrated by custodians and related people and also by studying related publications and reports.

i-History of Mannarashala and VettikottuKavu,

ii-Ambalapushapalpayasam,

iii-Mathur kavu&Ottanthullal,

iv-Itty Achudan'skavuetc are described.

## **CHAPTER X : THREATS AND RECOMMENDATIONS**

Regarding threats, intention showed by a few to reduce extent by shifting deity, encroachment, disputes on ownership, dumping waste etc. are discussed with examples and pictures.

### **Main recommendations**

- i. Awarenessprogrammes including suggestions to prevent dumping solid waste
- ii. Arrangement for fair distribution of grant to deserving custodians,
- iii. Production of quality seedlings of selected species,
- iv. Appropriate recognition to custodians for contribution in carbon sequestration,
- v. Topics for Research.

**Pictures on various sites, activities and plants- plates.**

## **PART II**

Maps of SGs with Id numbers taluk wise.

Detailed statements on SGs talukwise.

## CONTENTS

CHAPTERS	PARTICULARS	Page No.
<b>PART I</b>		
	<b>Preface</b>	<b>1-3</b>
	<b>Executive summary</b>	<b>4-8</b>
<b>CHAPTER I</b>	<b>Introduction</b>	<b>10-14</b>
<b>CHAPTER II</b>	<b>Review of literature</b>	<b>15-22</b>
<b>CHAPTER III</b>	<b>Result of Study</b>	<b>23-25</b>
<b>CHAPTER IV</b>	<b>Composition of vegetation with list of rare species</b>	<b>27-34</b>

<b>STATEMENT GEO/MANAGEMENT DETAILS</b>	<b>Of all the 2242SGs</b>	

## **CHAPTER I**

### **INTRODUCTION**

The existence of sacred groves in India dates back to ancient pre-agrarian hunter gathering era and their presence has been documented since early 1800's. Believing that trees are the abode of deities and ancestral spirits, many communities set aside sanctified areas of forest and established rules and customs to ensure their protection prohibiting felling trees, killing animals etc. The prevailing belief among devotees is that the presiding deities administer punishment to individuals or entire community in the form of diseases or crop failure. As a result of such restrictions, several endemic and endangered plant and animal species have survived in the sacred groves since so many years.

The Earth Summit of 1992 emphasized the immediate need for protection and conservation of biodiversity. Following that, the approach to biodiversity conservation gained revamping image all over the world. Subsequently in India the Biological Diversity Act 2002 was enacted. In the mean while, the Kerala Forestry Project (1998-2003) stressed the need for biodiversity conservation and constituted a Biodiversity Cell in Forest Department. The Kerala Forestry Project among other things proposed the need for long term conservation of sacred groves by taking up ecological survey and inventory of sacred groves. In addition the project provided for lump sum allocation of grants to local communities and religious groups to improve awareness, demarcation, protection and enhancement of local practices in Sacred Groves.

The year 2010-11 was declared as International Year of Biodiversity and various programmes were launched as part of its observance. Protection and Conservation of Sacred Groves is one among the schemes and KFD is providing grant to various selected sacred groves under this scheme. For implementing such a scheme a database covering inventory with all relevant details is very essential. Though studies have been undertaken and reports published on sacred groves of Kerala by various individuals and organizations, such reports do not cover all the relevant details and they cover only part of some aspects, that too incomplete.

This study is aimed at building a data base on the existence of sacred groves in Kerala, starting with Thiruvananthapuram district. Besides taking an inventory on the number of SGS available, information on the extent of vegetation, ownership, legal status, geographical location and such other important information are recorded in this report. The impact of such information on these patches of vegetation which have been surviving since long and its socio-ecological scenario would amply help policy makers establish guidelines and launch schemes for conservation. The absence of such information in the earlier available data base qualifies this study a unique venture.

This report is presented in two parts. Part 1 contains inventory details and vegetation study along with photographs of important sacred groves and plants. Inventory comprises various statements. This number can be taken as ID number of each SG. These numbers are shown in the respective taluk maps showing the location of the SG. The filled up formats giving all the details of each SG are included in the annexures such as details recorded. The words “Kavu” and “SG” are used often as synonyms of sacred grove.

As already explained, this report is unique in its approach and delivery:-

- A comprehensive inventory of sacred groves in Alappuzha District with location and route..
- A complete documentation of Geographical scenario including mapping
- Identification of plant species in detail with regard to selected sacred groves.
- Suggesting ID numbers to all the SGs.
- Preparation of a data base on folklore aspects
- Impact of the sacred groves in socio-economic scenario.
- Providing photographs of all important species existing in the SGs

## **METHODOLOGY**

### **Area of Stusdy**

The project proposal envisages to take up the study in all the 14 districts of Kerala. This report covers Alappuzha district. This is almost on the north of Kollam districtsituated between north latitudes 10<sup>0</sup> 17' 27" and 10<sup>0</sup> 51' 41" and East longitude 76<sup>0</sup> 40' and 76<sup>0</sup> 110'. The district stretches along the shore of Arabian sea for a total area of 1414 sqkm. The district is bounded by Kollam district on the south, Kottayam on the east

and Ernakulam on the north. . There are six taluks viz. Cherthala, Ambalapuzha,,Kuttanad, Mavelikkara, Karthikappally and Chengannur. There is no uphill portion anywhere in this district.

### **Objectives:**

1. Arrive at an exhaustive list of manageable size of the sacred groves.
2. Conduct a detailed study of the vegetation and fauna including the prospects for conservation
3. Conduct a detailed study on the legal status of these groves, dependency of local people on such sites and their economic value.
4. Document present religious practices festivals, folklore and folk art related to these sacred groves.
5. Evaluate the impact of various projects implemented at the instance of Forest Department and other organizations in some of the sacred groves.
6. Evolve suggestions for future conservation and management of these sacred groves including expansion.

In addition to the above, mapping also has been carried out.

### **Collection of available data**

Before taking up field study a complete list of sacred groves had to be obtained. The list of Sacred Groves (SGs) available with Social Forestry Division contained only around 219 numbers. Though offices of local bodies are supposed to have some data on this, it was found impracticable to pursue that source. Hence publicity was given in daily News Papers in the district twice calling for the information before and after starting the work to be received before . The response was from only about 300 custodians.. It is after the field work was organized that some more applications have been received. But major part of the number we could come across during the continuance of the field work by word of mouth which necessitated more than two to three visits to the same locality by the field team.

But by the time the field work was about to be completed IFK made a final call through the dailies against which more than fifty new applications were received. During the course of field work the field team received information locally about nearby sacred groves for which no application had been received. Such SGs have also been visited and

documented. Finally, from available data with Social Forestry, publicity in the press and through word of mouth, the number of sacred groves totaled 2242 against the estimated number which was around 100

### **Constitution of Field Team**

There were five teams constituted for field data collection. All these five teams were headed by one Rtd Section Forest Officer and a local person to assist. They were provided with necessary format for recording details, map of the taluks and G.P.S equipment for recording latitudes and longitudes.

### **Format for recording data**

A format was designed for the collection of data while visiting a sacred grove which proposed to collect information on name of SG, location, name and address of custodian, extent, Sy. No, Village and similar geographical details. Further, details on inspection would carry the vegetation, fauna, legal status, information of presiding deity, temples attached, a brief note on the route to reach the SG from a known place and similar essential facts.

### **Supervision of data collection and expenditure**

A subcommittee was constituted by the IFK Executive Committee to take appropriate decisions on expenditure and checking the data collected according to the format. Two or more of them often visit the sacred groves listed to satisfy the quality of working and render necessary suggestions required.

### **Extent of sacred grove**

The extent of sacred grove is recorded based on the actual area under vegetative cover. The documents if any produced by custodian may include the extent of temples or other ancillary areas. In such cases the actual area under vegetation is recorded on ocular estimation based on the experience of forest staff. They have also made it mandatory to record it in a very conservative manner in order to avoid any distorted figure on the higher side.

### **Legal status**

Legal status was looked into to classify the sacred groves into the following categories as could be verified from reliable records or information. (i) Managed by Devaswam Board (ii) Under public Trust, and Under Local Committee (iii) Private (includes family trust or kudumba ownership). More details about these will appear in the chapter on Sociological Dimensions.

### **Documentation of Flora and Fauna.**

Generally the field team is conversant with the identification of the species and common shrubs. But they have also taken the help of persons conversant with the identification of uncommon shrubs and herbs including medicinal plants. In addition services of an expert in Botany and Taxonomy also has been utilized to arrive at the wealth of flora in selected sacred groves.

## CHAPTER II

### REVIEW OF LITERATURE

There are plenty of literature authored by various scholars such as Gaikward, Oliver Kind, Dr. Raviprasad Rao, Muhamed Jafer Pilot & Radhakrishnan, Mohan C.N & Ganga Prasad, Unnikrishnan, U. M. Unnikrishna and others on the character and status of sacred groves in general which constitute the basis of this chapter partly. In addition there are various articles on SGs in other countries accessible through internet surfing. .

The sacred Groves came into existence thousands of years ago and in general they are dedicated by local communities to their ancestral spirits or deities. They have been defined by many authors like those above and all the definitions carry more or less the same meaning. The following are the views that emerge out of their contributions.

According to them Sacred Groves (SG) are a patches of vegetation or group of trees protected by the local people through religious and cultural practices evolved to minimize destruction. Sacred groves, the community based repositories of biological diversity are segments of landscapes typically covering a patch of vegetation with perennial water resources. They are patches of wilderness conserved owing to their perceived importance attached to a village deity.. Sacred grove is an age-old tradition where a patch of forest is dedicated to local deities and none is allowed to cut plants or to harm animals or do any form of life. Sacred groves are community based monuments of biological diversity.

#### **Global Scenario**

Sacred Groves (SG) are distributed across the globe and diverse cultures recognise them in different ways encoding various rules for their protection .Sacred groves associated with religious beliefs were there in many countries from time immemorial. Sacred groves have been reported from many countries like Mexico, Ghana, Nigeria, China, Syria, Europe and America.

In Europe sacred groves survived in the Baltic states longer than in other parts .The sacred grove island Estonia is the one.(See picture Plate-I)

In **America-The Bohemian Grove located in California** is a privately owned sacred grove and in mid July each year they perform symbolic rituals such as Cremation of Care. (PIATE-I)

In Africa, among the Kikuyu ,groves of *Migumu* tree are sacred and those trees were not to be cut. In these sacred groves, sheeps and goats were sacrificed and prayers offered for rain or fine weather or for curing diseases . In Kenya ,*Kaya* a sacred forest considered to be an intrinsic source of ritual power and origin of cultural identity . It is also a place of prayer for members of a particular ethnic group-Mijikenda people. The flora was used solely for collection of medicinal plants. Cutting and clearing trees were not permitted. In **Nigeria the Osum-Osobgo sacred grove** containing dense forests is dedicated to fertility god in Yoruba mythology and is dotted with shrines and sculptures . This grove was designated as a **UNESO World Heritage Site** in 2005.(see picture-PLATE-I )

The Greek and Roman landscapes were dotted with many sacred places which contain groves of trees and water springs. Groves were in existence in Greece and Rome long back. The most famous sacred grove in Greece was Oak Grove at **Dodona**. Resources from the groves were used for religious purposes. Animals like goats and deer were captured and offered to appease the deity. Trees in the groves could be used for building temple. Wood from sacred trees was believed to have magical powers when fashioned into statues of gods. This kind of multiple use relaxing strict measures on conservation caused decline of SGs in some parts of Europe. One great **Druidic groves in south Gaul (Rome)was cleared by Ceaser's troops** in an attempt to remove spiritual powers inherent in the grove. There was a grove in front of the **church in Weissenbach an der Triesting**.( picturePLATE II )

In Tuna a southern province in **China**, the inhabitants did not dare to touch the native mountain forest because of their fear on wrath of God.

In the **Caucasus Mountains** (Russia) each community had its own sacred grove. They worshipped these as sanctuaries built among age old trees which were never to be cut (see picture—*PLATE-- II* ).

In **Japan** the Seifa-Utaki contains a sacred grove, with rare indigenous trees like *Kubanoki*( a kind of Palm) and *Yubunikkei*( *Cinnamomum japonicum*) This is UNESCO World Heritage Site of 2003.

A grove near **Leona** all the way down a mountain side up to sea was dedicated to the goddess Artemis at the instance of Alexander the Great. Artemis was considered to be the protector of animals and plants.

### **Attitude by different Religions in the world**

Due to the rise in dogmatic religions like Christianity and Islam, which advocated faith in one God the tradition of maintaining sacred groves and sacred trees did not get an unconditional flow of support though sacred groves exist in many countries in some form or other among those religions. We can still get lot of instances to show that this attachment to trees coupled with spiritual beliefs exist among different religions also other than Hinduism.

In the kingdom of Shower in Arabia, tree worship was prevalent in 1860 for getting rain. Muslim Persians invoke the spirits supposed to dwell in certain trees by hanging on the branches , pieces from garments during some ceremonial occasions.

In Indonesia *Ficus bengalensis* is considered sacred . They believed the existence of holy spirits in the tree which would ensure availability of clean water.

There is a Parish Church of WeissenbachTreisting in Lower Austria, Europe, a grove exists in front of the church. .In Syria there is a grove sacred dedicated to Adonis at Afqa.

**Buddha** himself gained realization and enlightenment under a pipal tree. Buddha is reported to have been born in a sacred grove-Lumbinivana-full of Sal trees.(Gadgil 1985)

## **Indian scenario**

Of course in India the major religion that holds and protects sacred groves is Hindism, having several living and non-living elements of nature as objects of worship.

The general belief that sacred groves are maintained by Hindu community only is not fully correct. Other communities also have shown faith in the sacred trees. A little Sal forest in Gorahpur is maintained by a Muslim saint “Mian Sahib” . Nothing was allowed to be cut except for lighting sacred fire.

In Kolhapur district there exists a small sacred grove on the land of a Muslim peasant. This land was purchased by him from a Brahmin priest in 1962. The Muslim peasant observes “agrosaat” and “diwalsaat” ( pre-sowing and post sowing ceremonies) at this sacred grove along with adjoining Hindu peasants.

In Murshidabad district (Ragnathgunj town in West Bengal), in a mazaar-a pir- is located amidst a grove . On the top of the grave three trees –neem, mahakal, and bel are there which are worshiped by Hindus.

In the heart of Midnapur city, a sacred grove is dedicated to a pir called Hazrat Balak Shahid Rehmatullah Elachi, who died a few centuries back. There is a sacred well inside known as “Sheikh Kua”. People irrespective of cast or religion fetch water from this well as it is believed to have powers to cure diseases.

In Midnapur itself there is another big sacred grove dedicated to a pir called Baro Huzur and the SG is known as “Tapovan”. This is located at Istreegunj on the western fringe extending over three acres .Entry is restricted here. Wearing shoes is not allowed. Here also there is a sacred pond from where water is considered to have power to cure diseases.

In Tripura , prior to the tribe’s mass conversion to Christianity in the twentieth century the Darlong Community had worshipped Nature. They believed in the existence of an over-soul called “PATHIAN” which inhabit in rivers, forest, certain trees etc. It is reported that they had many rituals connected with these which were associated with supernatural influences.

If we take the case of Sabarimala Poonkavanam a typical and extensive sacred grove of Lord Ayyappa, holds the legendary association of “Vaver Swamy” a muslim, at Erumely which is still in vogue. The facts given stands to reason that sacred grove is not alien to communities other than Hindu.

### **Number of Sacred Groves**

The total number of sacred groves in any state or region estimated and reported is not based on any authentic sturdy. All the reports on the number of SGs go by rough estimation as can be seen below. The rough estimate of the number of sacred groves in India is around 14000 with an extent of about 55000 hectares . (Nalinakshan P.K – 2004). Another statement is that there are more than 50,000 sacred groves in India conserving the indigenous flora and fauna for the present and future generations. (Induchoodan N.C. Dr:) . It has been estimated that total number of sacred groves in the country lie between 100,000 and 150,000 (Malhotra,: 1998)- {Kannan C.S. Warriar, Kunhikannan. C &Gunasekharan. T – 2004}. However the overall picture in respect of India as a whole is not a matter of study in this report.But this calls for a comprehensive sturdy over the whole country.

In the beginning of the 19<sup>th</sup> Century, there were more than 30,000 groves in Kerala. A recent survey revealed that only less than 1000 sacred groves exist and most of them are less than 10 m<sup>2</sup> in extent. (Mohanani C.N. & Ganga Prasad.A). . It may be mentioned that Ward and Conner (1927) reported about 15,000 sacred groves in Travancore and Cochin regions ,of Kerala. On the other hand, it is estimated recently that only 2000 well preserved sacred groves are present in the whole state (Rajendra Prasad, 1995) {Chandrasekhara U.M -2004}. Kerala State is having only 556 sacred groves preserved with maximum numbers in Kozhikode (148) followed by Kasargod (112) and Kannur (67) in the North and Thiruvananthapuram (49) and Kollam (48) districts in the South- (Unni P N & Anupama C). The ENVIS Centre on Conservation of Ecological Heritage and sacred Sites of India gives a list of 299 SGs in Kerala .As for Alappuzha District the estimation is 33- by Dr. Induchoodan and 16-by ENVIS Centre. The Web Site of Kerala Forests and Wildlife Department adopted the figure -1500 for the state (2009). It is evident that there is no consistency in the reports by various authors on

the projected number of sacred groves and they are all far from actual position as can be seen in this study.

During 2005-08 a study was undertaken on the status and floristic diversity of sacred groves in Alappuzha district by Institute of Forest Genetics and Tree Breeding Coimbatore with Dr.Kannan C.S. Warriar as Principal Investigator. In this study report 1128 SGs have been recorded as identified the extent of which varied from one cent upwards.

## **Flora**

The vegetation in sacred groves is generally immensely rich in diversity of species depending on the conditions of habitat prevailing in various regions.. Studies made so far made till 2004 listed out 805 species of flowering and non-flowering plants belonging to 121 families, comprising 673 dicotyledons belonging to 95 families and 126 monocotyledons belonging to 20 families ( Unni P.N. & Anupama -2004).

Majority of the species belong to families such as Annonaceae, Menispermaceae, Capparidaceae, Malvaceae, Rutaceae, Meliaceae, Vitaceae, Myristicaceae, Fabaceae, Anacardiaceae, Rubiaceae etc.

Unni. P.N and Anupama have also provided a table listing the above 805 species in their paper ‘Conservation of sacred groves of Kerala: Need and strategies’ presented at the National Workshop on Sacred Groves held in September 2004 at Kozhikode. According to Gadgil and Vivek (1976) , sacred groves are the treasure of rare and endemic species. Many workers supported this view. For example, analysis of phytogeographical elements of sacred groves of Kerala indicates that 721 species (including Gnetumula) recorded from the sacred groves 154 are endemic to western Ghats and 33% of them are trees (Induchoodam 1998)-{ Chandrasekhara u.m.2004} .

## **Ecological functions**

### **Fauna**

Similarly, fauna in the sacred groves have been listed out which contain Amphibians-3, reptiles 10, and birds 164. This include 25 species of birds that breed in sacred groves. The Sacred groves are the last shelter of the common fauna including a

variety of insects, reptiles, mammals, birds and micro-organisms. Among the animals, a few are enlisted as threatened in India such as the fresh water and terrestrial tortoises, python, monitor lizard, mongoose, palm civet, Slender Loris, several amphibians, reptiles, apes and insects. The Malabar large spotted civet presumed to be extinct is reported last from some of the groves in Malabar. Birds, including a few migratory ones, select groves for nesting and breeding. A phenomenon known as over wintering (staying without going back) among winter visitors of birds is also noticed in some of these groves of Kerala. (Mohan C.N. to Ganga Prasad A-2004).

The major fauna of the groves comprise of snakes (cobra, viper and rat snake) water hen, toddy cat and mongoose. The pond contains various fishes, tortoise, frog and waters snake. (Kannan C.S. Warriar, Kunhi Kannan C and Gunasekaran T-2004).

The birds and bats find their natural nesting places in the sacred groves. They, in addition to their scavenger role check the insect and pest population. The bird droppings rich in phosphorous replenish the phosphorus deficient soil of the region. Snake and mongoose find their home in sacred groves. The snake controls the rodent population, which if left unchecked will destroy the crops of the locality. The snake population is kept under check by the mongoose. Insect fauna, particularly the bees make their hives in sacred groves and facilitate the cross pollination of many plants species of the locality. (U.M.Chandrashekara-2004)

According to Rajendraprasad (1995), sacred groves show high porosity and low bulk density compared to the soils of nearby areas. He also observed the thick litter covers and channels created by soil micro-fauna together enhanced the water retention, root system development, gaseous exchange and heat conductance. The role of sacred groves as micro-watershed in local area has been recognized by many workers. (Chandrashekara U.M.- 2004)

As an ecosystem, they help in soil, water and nutrient conservation and the ponds and streams adjacent to these groves are perennial water sources, which adequately explain their hydrological significance, though not evidenced through results of scientific investigation. (Unni P.N.& Anupama C-2004)

Ecology of birds has been described by P Padmanabhan (2009 KFRI Research Report 406 ) which states that sacred groves serve as a roost sites .The holes, cracks ,and rotting woodpecker holes in the trunks of trees serve as ideal roosts for about 50 different animal species.

## CHAPTER III

### RESULTS OF STUDY

#### General

The study revealed that there are 2242 sacred groves covering an extent of around 183 ha of vegetative cover. Most of them are having 0.3 to 0.8 canopy density. Among these 40 numbers have more than one acre in extent. The largest one is Mannarasalakavu near Harippad having not less than 8 Acs of wooded area in Karthikapally taluk. Cherthala taluk has the maximum number of SGs 877, and Kuttanad, the minimum-65.

In almost all the SGs there is at least one pond and Cherthala has the maximum number of ponds. There are some Sacred groves in which there is no deity, or no pooja or both. Such cases account for 75 numbers. Nearly 94 % of the SGs are under private ownership. There is only one which is under government. That falls in Karthikapally taluk and no pooja is being done here. The size of sacred groves are very small generally in Cherthala and Kuttanad taluks. Bigger ones are in both Mavelikara and Karthikapally taluks. As regards the extent, total area of SGs in the district is 451 Acs (183 ha.) and the SGs in Cherthala taluk, though small ones generally, constitute 29 % of this area..

## CHAPTER IV

### COMPOSITION OF VEGETATION

The species composition of trees in sacred groves consists of light demanders, shade bearers and shade tolerants. Seedlings of species, for which securing light condition is less pronounced, may come up or compete with the seedlings of top canopy species. As the top canopy trees of varying in growth requirements survive well, their regeneration under less favourable conditions particularly when the light condition is restricted, is a matter of study. Regeneration of shade bearing and shade tolerant species do come up but it persists for long periods in whippy form till favourable light conditions set in. These seedlings survive if soil conditions are favourable and root competition is less, provided they could build up reasonable level of root stock. It is by keeping these basic principles in mind the flora of the sacred groves have been examined.

#### **Vegetation.**

In general tree species are more. Next comes climber. In species diversity Mavelikara taluk tops while Kuttanad taluk takes the last position. In all nearly 450 species have been recorded leaving some unimportant plants or very common herbs.

Tree crop- The vegetation has certain distinctive ecological characteristics such as clear tiers of trees, shrubs herbs, besides the climbers, epiphytes parasites etc. The commonly seen trees in the Sacred Groves are *Holigarnaarnottiana* (Charu), *Hopea ponga* (Thambakam), *Strychnos nux-vomica* (Kanjiram), *Alstonia scholaris* (Ezhilampala), *Hydnocarpus pentandra* (Marotti), *Sterculia balangas* (Thondi), *Adenanthera pavonina* (Manchadi) and *Artocarpus hirsutus* (Anjili). The other trees enumerated are *Vateria indica*, *Diospyros peregrina* (Panachi), *Lophopetalum wightianum* (Venkotta), *Aporosa lindleyana* (Vetti), *Syzygium caryophyllatum* (Karimnjara), *Calaophyllum elatum* (Cherupunna), *Madhucaneriifolia* (Attuilippa), *Syzygium cumini* (Njaval), *Ailanthus triphysa* (Perumaram), *Ficus mysorensis* and other species of *Ficus* etc.

The diversity among shrubs and herbs are comparatively low. Some of the important shrubs seen are *Gomphiaserrata*, *Leea indica*, *Memecylon randerianum*, *Grewia microcos*, *Isonandra lanceolata* and *Acrostichum aureum*-a mangrove species.

The most notable feature of the Sacred Groves of Alappuzha district is the preponderance of woody climbers. The frequently seen climbers are *Dalbergia horrida* (Anamullu), *Uvaria narum* (Narumpanal), *Strychnos minor* (Vallikanjiram), *Sarcostigma kleinii* (Vellodal), *Gnetum edule* (Oolakodi) and *Calamus rotang* (Chooral). The other notable woody climbers are *Cissus latifolia* (Chunnambuvally), *Rourea minor* (Kooriel), *Calycopteris floribunda* (Pullani), *Erycibe paniculata* (Erumathali), *Tetracera akara* (Nakkuvalli), *Mallotus repandus* (Mulamkumbam) etc. Medicinally important climbers seen in the Sacred Groves are *Morinda umbellata* (Neyvalli), *Pothos scandens* (Paruvakkodi), *Salacia fruticosa* (Ponkorandi), *Salacia chinensis* (Ekanayakam), *Tinospora cordifolia* (Chittamruthu), *Hugonia mystax* (Modirakani), *Flagellaria indica* (Panambuvalli), *Cosmostigma racemosum* (Vattuvalli) etc. The climbing fern, *Stenochlaena palustris* is also noted in several Sacred Groves. The very rare climber *Strophanthus wightianus* (Kambetti) seen in OnampallilKavu of Alappuzha

Though most of the Sacred Groves are protected with compound wall and fence, the invasion of exotic weeds is a threat to the biodiversity. Exotics such as *Mikania micrantha*, *Derris scandens*, *Stenochlaena palustris* etc. form invasive species. Invasive species come up when native species are not able to dominate indicating poor ecosystem and degradation.

In Kunnumelkavu of Thathampally village there is dense vegetation. Out of the 32 SGs taken up for detailed study the maximum number of tree species (56) is seen in this SG. In Cheramangalam KailsKavu and Cheruvallikavu which are close by in Cherthala taluk there is abundance of *Calophyllum calaba* and tall trees of *Lophopetalum wightianum* are existing. Along with these there is under growth of *Ananas comosus* and *pandanus* in plenty. Maximum number of climbers is seen (45) in Chamakkavu. The Onampallikavu of Thekketkara village holds 22 species of herb. Here the tree *Symplocos chinensis* is growing. Mangrove species and its associates are noted in some of the SGs on coastal belt. The climbing fern *Stenochlaena palustris* is met with in Mankombukavu of Kuttanad.

A list of rare or important species are given in the following tabular form giving their location also.

**RARE or IMPORTANT PLANTS**  
**TREES**

Sl.no	Scientific name/Family	Remarks.
1	Acronychiapedungulata. Rutaceae-Muttanari. P-4	Chamakkavu -Elanjimelkavu, Prefers Loamy soil- white flowers Bark medicinal
2	Aglaia elaeagnoidea Meliaceae,	Punyava- Mannarasala- Ilanjimel Fruit medicinal-skin diseases
3	Crateva magna, Caparidaceae-Neermathlam	Muthedathukavu- Kuttanad
4	Elaeocarpusglandulos F-Elaeocarpaceae P-11	Cheruvallikkavu-.Kalavur village, Highly sandy area with water logged bits in between vegetation.
5	Lophopetalumwightianum F- Celastraceae Venkotta p-13	Shade tolerant Flowers attractive-Fruit 12 cm long capsule fruit- CheruvallikaraDevikshetraKavu- Kanjikuzhy-Cherthala. Picture-
7	Samaderaindica F-Simarobaceae- Karinjotta p-7	Peringanamkavu,Loamy soil with medium acidic-medicinal & insecticidal Fruit is red to pink and flattened Pictures-
8	Symplocoscochinchinensis F-Symplocaceae-Pachotti p-17	Onam pallilkavu-Petioles bracteole-Bark medicinal. Very often extracted by Hari Giri federation from the forests of Kerala Thekkekara village-Mavelikkara
9	Strophanthuswightianus F- Apocynaceae	Arthikkavu-Kuttanad

10	Morindacitrifolia F-Rubiaceae - Noni p-27	Grows well in sandy shores. Used as intercrop in coconut gardens in Kasaragod since it can tolerate shade. Fruit edible-attract bats. Medicinal.KulangaraIllumkavu-Kuttanad,Mankombu
11	Syzygiumlanceolatum Myrtaceae- Chool maram p-9	Vallatkavu-Cherthala, Medicinal, essential oil. Teatment for Sterility in women. UnnikaliBhagavathykavu.Cherthala taluk
12	Barringtonia racemose Magnoliopsida-Samudrakayu	Associate of mangrove.Kannampallikavu-Mavelikkara
13	Syzygiumjambos	Kulangaraillam Kuttanad
14	Ficusdrupaceae F-Moraceae p-6	Kalikkattukavu—komalapuramvillage, Fruit edible Canopy tree.
.15	.Mallotusatrovirens F-Euphorbiaceae	Aakkanattukau, Mavelikkara.
16	Actinodaphnemalabarica F-Lauraceae -Malavirinji	Vallatunnikalikavu- Bark paste has power to heal wounds

### Keystone species

Apart from direct benefits of biodiversity conservation, indigenous species have always sensed the indirect benefit which flow from sacred groves through ecosystem functions. There are some species, though present in small numbers, play very important role by their unique abilities such as nitrogen fixation and attracting many birds etc and help maintaining life forms in plenty. They are known as keystone species. These species have disproportionate large effect on other species in a community. Law (2002) tried to identify keystone species in two SGs based on following parameters.

i. Importance of value index (ivi) 'ii - Position of the canopy, iii - Position of growth form, iv. Association with other species (epiphytic growth), mobile links (pollinators, dispersers) ,v. Capacity to supply food resources for faunal diversity, vi. Succession status-light demanding/shade tolerant,vii- Biomass and nutrient allocation pattern to shoot and root.,viii. Shoot / root ratio of seedlings.'ix. Nutrient input to the system.

Once such species are removed from an ecosystem it may create dramatic changes in the rest of the community. Much studies have not been made on this aspect in respect of the SGs in Kerala. In Tamil Nadu *Ficus religiosa* and *F. benghalensis* - known as strangler figs, are considered to be Keystone species. These species have aggressive growth habit ensuring their regeneration and survival. They bear pulpy small fruits during dry summer when most of the other species do not. Hence they attract frugivorous birds, a few mammals and reptiles and several species of insects. Many pollinators and seed dispersers are attracted to promote regeneration in the plant community. In many of the SGs *Ficus* species are present. Another attraction is that the different species of *Ficus* bear fruits in different seasons also .The strong winding roots of *ficus* prevent soil erosion. It is because of these influences on other community these species are called keystone species. There can be more such species if studies are taken up in this direction.

Taking into consideration of the essential qualities of keystone species the following species seen in these SGs are suggested for consideration.

- i. *Vateria indica*-(Dipterocarpaceae). This is a shade bearer having no problems in regeneration. This has profuse seeding habit. It occupies the canopy in a spreading manner and flowers during January-March.
- ii. *Caryota urens* (Palmae)-This is almost very common in the SGs. Its regeneration status is excellent. Most of the time it is in flowers or fruits. It is attracted by many birds and mammals. Bats always finish it in course of time. It provides toddy.
- iii. *Mimusops elengi*-(Sapotaceae)-This is a graceful tree with dense crown. Flower profusely during December to February.
- iv. *Holopternota indica*-(Anacardiaceae) This is shade tolerant. Flowering during Jan-Feb. Its fruit is liked by porcupine. This also is a common tree in SGs.
- v. *Schleichera alba*-(Sapindaceae) Flowering during February. Produces plenty of seeds. The tree is draught hardy and shade tolerant. It regenerates well both from seeds and root suckers. It also coppices and pollards in natural conditions.
- vi. *Calophyllum calaba* . In shady areas this species is very common and flowering/fruiting are also fine. Many epiphytes grow on these.

All the above species are shade tolerant, have good regeneration. They are in one way or other attract birds and other fauna.

## CHAPTER-V

**DETAILED INVENTORY IN SELECTED SACRED GROVES****AMBALAPUZHA TALUK, ALAPUZHA****1. Maruthachikkal Kavu, Kalarkode, Alappuzha-Abpa/162- 15 cents**

----	-------------------------	-------------	-----------

The Sacred grove is with dense vegetation. Tall trees of *Persea macrantha*, *Aphanamixis polystachya*, *Mangifera indica*, *Mimusops elengi*, *Albizia chinensis* etc. are common. Cimbers like *Pothos scandens* and *Stenochlaena palustris* are grown over the trees. The undergrowth is also very dense in most of the parts with seedlings of trees. In the open areas *Mikania micrantha* has infested.

5	Centella asiatica	Apiaceae	Kodangal, Mutthil
6	Desmodium triflorum	Leguminosae	Cherupulladi
7	Drymoglossum heterophyllum	Pteridaceae	Seethathaali

In this grove, there are no Naga idols. The vegetation is dense with trees and climbers. Bats are plenty.

### 30. Ganapathy Temple Kavu, Thalavady-Kuttanad-Id-62

	Scientific name	Family	Local name
<b>TREE</b>			
1	Adenanthera pavonina	Leguminosae	Manchadi
2	Aphanamixis polystachya	Meliaceae	Chennelli, Chemmaram
3	Artocarpus hirsutus	Moraceae	Aanjili, Ayani
4	Caryota urens	Arecaceae	Choondappana, Olattipana
5	Cinnamomum malabattrum	Lauraceae	Vayana
6	Cocos nucifera	Arecaceae	Thengu
7	Ficus hispida	Moraceae	Paarakam
8	Ficus drupacea var. pubescens	Moraceae	Manja-aal
9	Ficus tinctoria subsp. gibbosavar. Cuspidifera	Moraceae	Itthi
10	Hydnocarpus pentandra	Flacourtiaceae	Marotti
11	Macaranga peltata	Euphorbiaceae	Vatta
12	Morinda citrifolia	Rubiaceae	Cherumanjanathi
13	Polyalthia longifolia	Annonaceae	Aranamaram
14	Schleichera oleosa	Sapindaceae	Poovam
15	Streblus asper	Moraceae	Paruvamaram
16	Terminalia bellirica	Combretaceae	Thaanni

17	Theobroma cacao	Sterculiaceae	Coco
<b>SHRUB</b>			
1	Antidesma acidum	Euphorbiaceae	Asaripuli, Arippazhachedi
2	Capsicum frutescens	Solanaceae	Kantharimulaku
3	Chassalia curviflora var. Ophioxylodes	Rubiaceae	Yamari
4	Glycosmis pentaphylla	Rutaceae	Paanal
5	Sauropus androgynus	Euphorbiaceae	Velicheera
<b>CLIMBER</b>			
1	Anamirta cocculus	Menispermaceae	Pollakkai, Nanchuvalli
2	Argyrea populifolia	Convolvulaceae	
3	Cayratia pedata	Vitaceae	Chorivalli
4	Cissus latifolia	Vitaceae	Chunnambuvalli
5	Merremia vitifolia	Convolvulaceae	Manjavayaravalli
6	Mikania micrantha	Asteraceae	Dhrirashtrapaccha
7	Pothos scandens	Araceae	Padayara, Paruvakkodi
8	Tiliacora acuminata	Menispermaceae	Vallikanjiram
9	Uvaria narum	Annonaceae	Narumpanal
<b>HERB</b>			
1	Elephantopus scaber	Asteraceae	Aanachuvadi
2	Lagenandra ovata	Araceae	Aandavazha
3	Oplismenus compositus	Poaceae	

1. In this grove there are no Naga Idols. There are two very rare trees of *Schleichera oleosa*. The dominant climber is *Anamirta cocculus*. *Mikania micrantha* has invaded the grove.

### 31. Kulangara Illam, Mankombu, Pulinkunnu-Kuttanad-Id-11

	Scientific name	Family	Local name
<b>TREE</b>			
1	Areca catechu	Arecaceae	Adakka
2	Artocarpus heterophyllus	Moraceae	Plavu
3	Artocarpus hirsutus	Moraceae	Aanjili, Ayani
4	Barringtonia racemosa	Lecythidaceae	Adambu, Samudrakkai
5	Butea monosperma	Leguminosae	Plash, Chamatha
6	Calophyllum inophyllum	Clusiaceae	Punna
7	Caryota urens	Arecaceae	Choondappana, Olattipana
8	Cocos nucifera	Arecaceae	Thengu
9	Ficus hispida	Moraceae	Paarakam
10	Garcinia gummi-gutta	Clusiaceae	Kodampuli, Pinar
11	Glochidion zeylanicum	Euphorbiaceae	Neervetti
12	Holigarna arnottiana	Anacardiaceae	Cheru
13	Lanea coromandelica	Anacardiaceae	Karasu, Udhi
14	Mangifera indica	Anacardiaceae	Mavu
15	Mimusops elengi	Sapotaceae	Ilengi
16	Morinda citrifolia	Rubiaceae	Cherumanjanathi
17	Polyalthia longifolia	Annonaceae	Aranamaram
18	Phyllanthus emblica	Euphorbiaceae	Nelli
19	Spondias pinnata	Anacardiaceae	Ambazham
20	Syzygium caryophyllatum	Myrtaceae	Karinjara
21	Syzygium jambos	Myrtaceae	Champa
<b>SHRUB</b>			
1	Chromolaena odorata	Asteraceae	Communistpatcha
2	Ficus tinctoria subsp. parasitica	Moraceae	Kallithi
3	Leea indica	Leeaceae	Njellu
4	Nephrolepis hirsutula	Nephrolepidaceae	Pannal chedi
5	Pandanus odorifer	Pandanaceae	Kaitha

6	Phyllanthus reticulatus	Euphorbiaceae	Neeroli
7	Senna alata	Leguminosae	Puzhukkadikkonna
<b>CLIMBER</b>			
1	Argyreia sp.	Convolvulaceae	
2	Cayratia pedata	Vitaceae	Chorivalli
3	Centrosema molle	Fabaceae	Kattushangupushpam
4	Derris scandens	Leguminosae	Ponnamvalli
5	Derris trifoliata	Leguminosae	Kammattivalli
6	Mikania micrantha	Asteraceae	Dhrirashtrapaccha
7	Pothos scandens	Araceae	Padayara, Paruvakkodi
8	Stenochlaena palustris	Blechnaceae	Pannal valli
9	Uvaria narum	Annonaceae	Narumpanal
<b>HERB</b>			
1	Acmella calva	Asteraceae	Eripachha
2	Centella asiatica	Apiaceae	Kodangal, Mutthil
3	Cyperus digitatus	Cyperaceae	
4	Desmodium triflorum	Leguminosae	Cherupulladi
5	Lagenandra ovata	Araceae	Aandavazha
6	Leucas aspera	Lamiaceae	Thumba
7	Mimosa pudica	Leguminosae	Thottavadi
8	Paspalum conjugatum	Poaceae	
9	Phyllanthus airy-shawii	Euphorbiaceae	Keezharnelli

Trees in the grove are a few. It is noticed that several trees were cut from the area around the grove and cleared by burning.

### 32.Mathur Kavu, Nedumudi Kuttanad-Id-17

	Scientific name	Family	Local name

5	Phyllanthus airy-shawii	Euphorbiaceae	Keezharnelli

## CHAPTER VI

### PLANT FREQUENCY ANALYSIS

tribution in the sacred groves.

Among the \*sacred groves (SGs) of the district, one time enumeration was carried out in 32 SGs based on the extant of area, vegetation type and location in the six taluks viz. Ambalapuzha, Cherthala, Mavelikkara, Chengannur, Karthikapally and Kuttanad. For the analysis of the frequency of distribution and occurrence, perennial species like trees, shrubs and climbers alone were taken because enumeration was carried out only once in the Sacred groves. Among the 324 species enumerated, 134 are trees, 112climbers and 78 shrubs. With regards to the frequency of occurrence, the most widely occurring species is *Pothos scandens*. It is occurring in 31 SGs; followed by *Artocarpus hirsutus* in 28 SGs; *Holigarna arnottiana* in 27 SGs; *Uvaria narum* in 24 SGs and *Hydnocarpus pentandra* in 23 SGs. No species is found occurring in all SGs. As many as 122 species are occurring in one SG; 38 species in two SGs; 27 species in three SGs and 24 species in four SGs. The frequency of occurrence of species in different sacred groves is provided in table 1-26 and figure1.

Analysis of species distribution shows that as many as 22 species enumerated from Chamakkavu has not been recorded from other SGs; Kunnummel Parambu Kavu has 8 species; Onambillil Devi Kshethra kavu (Choonattu kavu) has 7 species; Nalekaattil Bhagavathi temple has 6 species.

\*the total number of sacred groves in Alappuzha

**Table 28. Taluk-wise occurrence of species of trees, shrubs and climbers**

Taluk	Trees	Climbers	Shrubs	Total
Ambalappuzha	122	95	49	266
Cherthala	148	94	59	301
Mavelikkara	192	187	81	460
Chengannur	91	79	43	213
Karthikapally	99	84	36	219
Kuttanad	77	45	28	150

**Among the taluks, Mavelikkara has the highest species diversity.**

The analysis with respect to family shows that Leguminosae is dominating family. It has 34 species. Followed by Rubiaceae (22 species); Moraceae (18 species); Euphorbiaceae (17 species)

Among tree species, Moraceae is dominating with 17 species, followed by Leguminosae (15); Euphorbiaceae (8); Arecaceae (6).

Rubiaceae is dominating in shrubs with 15 species, followed by Euphorbiaceae, Melastomataceae and Verbenaceae with 5 species in each.

Leguminosae and Convolvulaceae are dominating in climbers with 15 species, followed by Asclepiadaceae, Menispermaceae and Vitaceae with 6 species in each.

Analysis with respect to taluk shows that, out of the 6 taluks of Alappuzha district, 4 taluks are dominated by the family Leguminosae.

In SGs of Ambalappuzha taluk, Leguminosae is dominating with 12 species. Followed by Moraceae and Rubiaceae with 7 species in each.

In Cherthala taluk, Leguminosae is the dominant family with 14 species. Followed by Rubiaceae and Moraceae with 11 and 7 species respectively

In Mavelikkara taluk, the family Moraceae is dominating with 16 species. Followed by Rubiaceae (15) and Leguminosae (14).

In Chengannur taluk Leguminosae and Moraceae is dominating with 11 species. Followed by Euphorbiaceae (8) and Apocyanaceae (7)

In Karthikapally taluk Rubiaceae is dominating with 9 species. Followed by Apocyanaceae, Leguminosae and Moraceae with 8 species

In Kuttanad taluk, Leguminosae is dominating with 12 species. Followed by Moraceae (10) and Convolvulaceae (7)

## CHAPTER VII

### ECOLOGICAL STATUS

The sacred groves irrespective of their size exert influence in the ecological status of a given area. The typical vegetation that constitute the relics of age old forms of plants, the soil that regulate their preponderance, the underlying geological setup, the animals & insects that often move about, the root system and the general climate play their respective role in building up the ecological status. The vegetation as well as the biological setup in a sacred grove is normally fully protected from human interference through customary taboos and sanctions. In such a typical condition there can be immense activity among and between all living organisms. This provides plenty of resources for research on some of the aspects not seen studied hitherto. In this chapter with the limited scope to undertake a study on this vast subject, the observations made with the basic principles relating to ecological status have been presented. This is confined to vegetation, soil conditions, faunal significance and water conservation.

The original vegetation could have been part of tropical evergreen forest and the soil is reported to have been built due to reclamation or retreat of the sea as revealed from history. Soil is varying in fertility and major portion is peaty or alluvial. The midland portions shared by Mavelikkara and Chengannur taluks have lateritic soil promoting good growth of plants. In Kuttanad taluk soil is mainly alluvial inter mixed with peat and in the remaining taluks it is sandy and moist. The large extensive stretches of the land settled below sea level in Kuttanad presents a comparatively low density of vegetation. With slight exception in respect of Kuttanad, in general, potassium level is low to medium, available phosphorus is high, pH low to medium, exchangeable carbon and available Nitrogen high to medium. The soil analysis got done taking 21 samples from different sacred groves spread over suggest these details.

Ecological status of plant growth can be judged by the variation in plant composition from the adjoining districts. In Kuttanad area there is higher recurrence of *Karimpana* -*Borassus flabellifer*- which is usually considered preferring dry areas in the south. The reason is worth studying. Apparently this particular species might have been artificially planted by virtue of its importance in rituals. *Caralliabrachiata* growing in the

lateritic soil in the adjoining districts is seen with aerial roots announcing its origin to Rhizophora family. This is seen in the famous Mannarasala Sacred Grove.

Similarly the mangrove fern- *Acrostichum aureum*, a straight growing fern having medicinal value ( picture below) is noticed in ParimanathuKavu of

Komalapura  
m village in

Ambalapuzha taluk. Similarly mangrove associates like (source-internet) *Acrostichum* fernKandeliakandal, *Bacopa* spp. *Pandanus* etc are met with in the SGs of Cherthala taluk. *Mucunagigantea* a woody climber which is very rare is seen in MannarasalaKavu and in an SG in Pathiramanal island. *Flagellaria* ,another large climber is also noticed in Pathiramanal.

Invasive climbers-

There are some climbers like

*Asparagus racemosus* (sathavari) is seen growing over the trees up to the top canopy in Edayodikavu. Similar

growth of another invasive species can be seen in Punnamuttathilkavu in Bhraninganam village of Mavelikkara where even regeneration is badly suppressed. Kalaricalkavu in Karthikapally is another example *Asparagus* going up to the top canopy of Edayodikavu as in picture.

In depressions of some SGs cane comes up profusely as shown below-from Vettikkotukavu- of Mavelikkara taluk.

### Natural Regeneration

Natural regeneration in humid tropical forest is highly complex and least understood. In a closed canopy, it depends on gaps created by natural agencies like wind, old age of trees and so on. Stool shoots generally arise from short lived adventitious buds formed between the wood and bark of the stump.

Natural regeneration depends on the following-

Seed production, age of the tree, predation of seeds, failure of ovule development, interval of seed production., dispersal and germination-In the case of orthodox seeds - viability is long. As regards recalcitrant seeds, they are killed if moisture content is below a certain value. Large seeds do not germinate unless they are buried beneath the litter or mineral soil as seen in the case of *Hydnocarpus pendantra*, *Elaeocarpus*, *Mangifera* etc. Though the size of the seed of *Diospyros perigrina* is comparatively smaller its regeneration depends on nature of disbursement. It is a shade bearer. Its seeds are dispersed by bats and monkeys. If exposed to sun for longer period it seldom germinates and grows. This is confined to wet locations of coastal belt. Regeneration in the form of root suckers is also noticed in respect of *Charallia brachiata* and *Strychnos nux-vomica* in some cases. The predominance of sandy soil in most of the area promotes regeneration of *Vateria indica*, *Hopea panga*, *Calophyllum calaba*, *Garcinia* sp. etc. As most of the tree species are shade tolerant regeneration is not a problem unless heavily suppressed by climbers. *Samadera indica* which can come up in shade conditions are regenerating well in the SGs of Karthikappally taluk. Thicket of natural regeneration of trees and shrubs are noticed in the SGs of Kattanam village of Mavelikkara taluk and Karuvatta of Karthikappally taluk.

Natural regeneration is generally good in the case of Anjily (*Artocarpus hirsutus*), Manchady (*Adanthera pavonina*), Charu (*Holigarna arnotiana*), Vetty

(*Aporusalindleyana*), Uletty (*Caryottaurens*), Marotty (*Hydnocarpuspentandra*), Kanjiram (*Strychnos nu-vomica*), Kulamavu (*Machilusmacrantha*), Thanni (*Terminalia bellirica*), Vayana (*Cinnamomummalabathrum*) etc. which are common in almost all the sacred groves..

Natural regeneration of shrubs and climbers is not a matter of concern since they multiply even under reduced light conditions. As most of the SGs are small in extent unlike large extent of forest growth, light penetration from lateral side is also possible which mitigate adverse condition for the growth of light demanders.

### **Soil Condition in Sacred Groves.**

Periodicity of litter fall varies according to seasons. It starts by winter and goes on till March. Fine root production starts in Feb-March and reaches its peak during rains. Studies indicate that litter is the main store house of Nitrogen than fine roots and microbial biomass. Litter decay starts by first few showers and reaches its peak in the rainy season. It releases nutrient fast during rainy season when the up take by plants is very high. Litter and fine roots normally add phosphorus to soil, but relatively less. The input of N is very much higher than other nutrients. Mineralization (by which humus is converted into inorganic nutrients) during wet weather and immobilization during the dry season is common as regards N is concerned. Gall is an abnormal swelling of plant tissue by parasitic organisms on leaves. Parasites stimulate production of galls by secreting chemical irritants on the plant tissue. This is noticed in areas with high organic compound.

Out of the six taluks in this district, three namely Cherthala, Ambalapuzha and Karthikapally are right in the coastal zone. Here the soil is very much sandy. Next two taluks-Mavelikkara and Chengannur are lying towards the midland exhibiting gravelly, lateritic and also sandy loam. Acidity is medium to high in all the above taluks. The sixth one -Kuttanad -Tauk is unique in some respects. It is part of Kule lands being situated 0.5 to 2.5 m below sea MSL. The soil here is a mixture of sand and clay in varying proportions. In some of the portions, there is also partially decayed organic matter (peat) and pyrites in high amount. The soil is highly acidic and saline. But sacred groves are not seen in such portions. Compared to other taluks the soil is not congenial for growth of

trees generally as could be seen from the scattered trees of sacred groves. Most of the groves have very open canopy

## WETLANDS

The wet lands in sacred groves of Alappuzha district are yet to be studied scientifically . Compared to other districts, the occurrence of ponds and life forms within it stands unique. This district on two sides is surrounded by the Vembanad-Kole wetlands of Ramsar site. Detailed studies have been taken up on the wetlands in this region by Wetland International-South Asia, and authorities concerned with Wetland (Conservation and Management) Rules 2010 under Environment Protection Act. 1986. With the rapid depletion of biodiversity in respect of marine life and avian, the state wildlife board has, it is reported, has put forward a resolution to conserve the biodiversity of wet lands and to focus the conservation efforts on natural habitats. But in our search the numerous ponds that exist nurturing various life forms like tortoise and fishes within or attached to sacred groves are lost sight of. This study among other things recorded the existence of ponds in each sacred grove and an abstract is given table below.

Name of Taluk	No. of SGs	Area Ha.	No. of Ponds	Approximate-Area of wetland
Cherthala	877	52.36	702	
Ambalapuzha	255	15.36	201	
Kuttanad	65	2.46	21	
Karthikapally	433	47.25	286	
Mavelikkara	486	51.6	236	
Chengannur	125	13.53	32	
<b>Total</b>	<b>2241</b>	<b>182.55</b>	<b>1478</b>	<b>1478x 2= 29.56 ha.</b>

The quality of water is not exactly known. But it is presumed that in ponds within Chengannur and Mavelikkaratauku water may not be saline as evidenced by the existence of tortoise. ( Whether tortoise can accommodate saline water is not examined). Cherthala, Mavelikkara and Karthikappally do have a high number of ponds.

## **Faunal significance**

The sacred grooves harbour numerous birds, butter flies and bats apart from primates and small mammals.( Chandran-1993). Number of tortoise live in ponds attached to SGs. In one SG- there are two varieties. On the ground there are termites, ants and earth worms which play an important role in building up soil .Around 100 sp. of mammals,476 sp. of birds, 156 sp. of reptiles,91 sp. of amphibians and 196 sp.of fishes are reported to be available in the sacred groves of Kerala.(KFRI Reserch Report.406) Though the above information indicates the potential giving an overall picture, in these pockets of SGs, only some of them are available depending on the conditions of the habitat. The animals found are those which nested there in like snakes, frogs, tortoise, lizards etc. and those visit the site for food and temporary shelter like bats. A clear study on this fauna would involve long period of periodical observation by experts, not to speak of the cost. In this report the study team noted the animals seen directly and also gathered information from the custodians or local people and also available literature specific to such cases. Bats and Peacock are the animals very frequently visiting these SGs. Termite mounts are rarely noticed even though they are present inside dead wood and below soil.

## **Bats**

The bats visiting the SGs fall under the category of fruit bats and they form abundant group of mammals. They are seen roosting in many sacred groves. They play important ecological roles as prey and predator, arthropod suppression, seed dispersal ,nutrient distribution etc. As studies indicate that the economic benefits from bats in general are, biological pest control, plant pollination, seed dispersal, guano mining, bush meat and medicine, aesthetic value, education and research. In spite of the economic benefits, damage caused on human, livestock and agricultural crops are also reported. They have enemies also such as amphibians, reptiles, owls etc. Although pollination by bats is relatively uncommon, in arid and semi-arid habitats agave and cacti are pollinated by bats. Seed dispersal in respect of fleshy fruits done by bats is tremendous. The night foraging fruit bats are more active than birds in foraging fleshy fruits, covering long distances and defecate during flight and thereby contribute seed dispersal.

The guano is having high nutrient potential and it is dispersed over landscape during flight. Bat guano is reported to support diversity of organisms like arthropods, fungi, bacteria and lichens.

With the basic information as described above when we watch their role in sacred groves we feel that many of the observations and their behavior remain unanswered. Generally the bats seen in sacred groves are those having yellow colour at the abdomen which is visible when they hang upside down while roosting. They are commonly seen roosting in trees like, Vateria, Elanji, Jnaval, ElavuPunna and Pana. Evidently they prefer trees bearing fleshy fruits.

Another observation is that they are not very common in sacred groves. But there are many SGs where bats are not reported. Though they are seen in one SG in the nearby SGs they are absent. They are seen only in very few SGs attached to temples. Here again they occupy isolated corner where disturbance is least. One reason for their selection of SG may be least disturbance from people, availability of fruit trees not only in the SG but in surrounding area supporting palms like coconut, and areca nut.

Apparently they avoid crop applied with pesticides . The damage to trees from bats is not reported. A few of them was located in Ayamkudikavu in Kuttanad area. In this area there is no idol worship and vegetation is dense. Undisturbed area which is free from pollution due to application of insecticides attract these bats. Similarly butterflies get attracted not only to flowering plants such as Neermathalam, marotti, medicinal plants but also prefer wet soil. It is learnt that the male ones carry out mudlipping in wet soil for certain salts like sodium for their propagation. The one instance of their mating was seen which is given in picture above.

## Carbon sequestration

Sacred groves cannot be taken as an isolated system. By its presence amidst a mosaic of landscape such as fringe forests, cultivated areas and human settlements sacred groves enhance the landscape heterogeneity and biodiversity. An assessment on this contribution by sacred groves is a matter of study to be undertaken by bio-diversity organizations.

## Role of termites-

Literature on termites-

“Termites form a significant element of soil micro-fauna. The food of termites mainly is plant material. Termites can also feed on animal products such as dung, fresh mammalian carcasses. According to relevant literature-Some termites feed directly on the wood of living trees while there are others which depend on humus in the soil. The former type posses an intestinal fauna of flagellate protozoa which initiate the digestion of cellulose. The other one depend on fungi and bacteria acting on food supply before it is eaten. One sub-family of *Termitidae* collects sound wood and stores it (*Macrotermitinae*) within the nest to be worked on by specific fungi. Another type depends on the humus present in the soil for nourishment and utilizes large amount of excreta for construction of mounds. Studies on termites also reveal that they have no sight and they are deaf. They recognize their nest mate by their special odor. They leave scent trails to food sources outside the nest. The scent comes from a gland present on the underside of the abdomen.”

“Below ground nests are very common where moisture remains at low levels throughout the year. Here evaporation and desiccation remain low. Cellulose is the desired product for them though they feed on grain, dung etc. Lignin from plant particle is used to reinforce nest material and shelter tubes though it is non-digestible. They eat their dead to gain protein-a case of cannibalism. In dry conditions termites are the main decomposers of litter due to their ability to avoid dehydration and face prolonged desiccation.”

“The influence of termites on living trees adversely affects timber production. But their activity on fallen and dead wood in sacred groves improve the soil fertility. Termite take active role in cellulose processing and soil bioturbation. In doing so they establish

symbioses with both microbes in the guts and many organisms in their mounds. They act on soil and litter by feeding and excavating soil. They break down litter into smaller particles and expose inner surfaces of litter for early action by bacteria and fungi.”

As far as this district is concerned, dead wood in the sacred groves and dry soil are seldom noticed and that may be the reason for rare occurrence of termite mounds. Only in some SGs having lateritic soil such as termite mounds are noticed. Whether they are existing under soil is not known.

## **Peacock**

Peacock visits some of the SGs finding favourable conditions of food. It feeds on plant parts, insects, white ants etc. Also, it takes plenty of water. It can devour even snakes. It scratches termite mound in sacred groves and eat the ants coming out. Pea fowl is reported from many of the SGs. But they are mostly on the move. They prefer SGs adjoining paddy fields. Local information is that they suddenly appear in the morning or evenings soon after rain subsides. Sacred groves with light canopy and bushy undergrowth or tall grass are stated to be their favorite. Their way of foraging make the surroundings healthy. They feed on lizards, rodents, and even small snakes. They avoid flying but do fly to tall trees for roosting.

By virtue of their iridescent bluish green plumage and beautiful large tail they are noticed easily by people. They escape from falling victim to the hunters as long as they are in the vicinity of sacred groves.

## **Indigenous Fishes**

Indigenous fishes like varal-snake head (*Channa striatus*) and kaithakkora—climbing perch (*Anabas testudineus*) were noticed in the ponds. These fishes have almost disappeared from the ponds in the villages due to filling of ponds and introduction of exotic fishes. The pond before converting in to fish farms, the water in the pond is treated with chemicals to eradicate indigenous fish fauna.

## **CHAPTER VIII**

### **SOCIO CULTURAL ASPECTS**

#### **Introduction**

The district of Alappuzha was formed on August 17, 1957 and the present name Alappuzha was given in the year 1990. Due to so many ecological, scientific and geographical reasons, it is believed that the coastal areas, rather the coastal taluks itself, ie, Cherthala, Ambalappuzha and Karthikappaly might have been under water and later emerged out as a result of accumulation of soil, silt and sand and the simultaneous receding of sea. The area presently known as Kuttanad was well known even in the era of the Cheras. The Cheras had their home in Kuttanad and they were called 'Kuttuvans' and hence the name. The ancient famous travellers like Pliny and Ptolemy of the first and second centuries had mentioned about places like Purakkad (Barace) in their literature. The Church located at Kokothamangalam is believed to be founded in the 1<sup>st</sup> century. The famous literacy work, 'Unnineeli sandesam' gives insight in to the early period of this district.

#### **Historical & Cultural background**

During 16<sup>th</sup> century small principalities like Kayamkulam (presently Karthikappally and Mavelikkara taluks), Purakkad which was often called Ambalappuzha or Chempakasseri (present Ambalappuzha and Kuttanad taluk) and Karappuram comprising of two principalities called Moothedath and Iledath (present Cherthala Taluk) emerged into power. In the same period the Portuguese came into prominence in the political scene of the district. Christianity became popular in all parts of the district. The kingdom of Chempakasseri was at its zenith during the reign of Pooradam Thirunal Devanarayana, a great scholar and a poet who was the author of 'Vedantha Retnamala', a commentary on the first verse of Bhagavat Geetha. It is said that Sreekrishna Swami temple at Ambalappuzha was constructed and the idol of Lord Krishna installed during that time. It is believed that Melpathur Narayana Bhattathiri, Sri Neelakanta Deekshithar and Sri Kumaran Namboothiri were eminent scholars who patronized his court.

In the 17<sup>th</sup> century the Portuguese power declined and the Dutch had a predominant position in the principalities of this district. As a result of several treaties signed between the Dutch and the Rajas of Purakkad, Kayamkulam and Karappuram, the Dutch built factories and warehouses in various places of the district for storing pepper, ginger etc. In course of time they interfered in the political and cultural affairs of the district. It was at that time Maharaja Marthandavarma, the ‘Maker of modern Travancore’ entered in the political affairs of those principalities. The annexation of the Kingdoms of Kayamkulam, Ambalappuzha, Thekkumkur, Vadakkumkur and Karappuram to Travancore gave the Dutch a setback from the political scene of the district. Marthandavarma Maharaja had a remarkable role in the internal progress of the district. He gave special attention to the development of Mavelikkara as an administrative as well as a commercial centre. The Krishnapuram palace, which is now a protected monument of the State Archaeology department, was constructed during that period. It was at that time that the great talented poet Kunjan Nambiar was installed in the court at Trivandrum.

Alappuzha has contributed its might to the development of Malayalam language and literature. Two stalwarts of Malayalam literature namely Sahitya Panchananan P.K.Narayana Pillai and Thakazhi Sivasankara Pillai hailed from this district. The great linguist and grammarian, I.C. Chacko, was also born and brought up in this district. It is also worth mentioning that the first cinema studio in Kerala was started in Alappuzha district.

### **The Concept of Sacred Groves**

Traditional and indigenous communities in India are of the religious belief that medicinal groves and plants are sacred in nature. Sacred groves (SGs) are patches of trees on forest land that are protected communally with religious zeal and connotations. These forest areas have been protected since ages by traditional societies and indigenous communities with their socio-cultural and religious practices. Sacred groves as a rule are treated piously. Sacred trees are prohibited from cutting and not axed except when wood is needed for the religious purposes like construction and repair of temple buildings or in cases like worshiping, death ceremonies and temple rituals. Thus, SGs carry direct and everlasting pious status and assist in maintaining social fabric of the society. Sometimes, they are also known as natural museums of giant trees, treasure houses of threatened species, dispensaries of medicinal plants, regulators of water sheds, recreation centers for

urban life, veritable gardens for botanists, gene banks of economic species as well as rare and endangered species, paradise for nature-lovers and so on.

In India, different religions are having different traditions, beliefs, and rituals that are associated with conservation of biodiversity and forests. In Hindu religion, it is a traditional belief that nature shows a reverence for five basic elements i.e., Earth (*Prithvi*), Fire (*Agni*), Water (*Jal*), Air (*Wayo*) and Space (*Akash*). All the five elements are treated as a body of God and are worshipped. These five elements are protected for religious, cultural and spiritual reasons. There are many studies entitled to further quantify this ethics, which leads to biodiversity conservation and sustainable ecosystem (Pal and Mukhopadhyay [2011]).

### Scenario in the district

Categorization of Sacred Groves of Kerala were once a common feature in every village. Time immemorial, the original groves came in to the hands of individual families and remained family-owned property. As the families split into smaller units, any of the members retained the grove with the place of worship. Since many families were unable to follow the 'Kavu' rituals, they were handed over to organizations like the Devaswom Boards or local trusts and temple committees.

Till the beginning of this century, sacred groves were an indispensable adjunct of the traditional Hindu families of Kerala. Sacred groves and associated ponds constituted a unique network of ecological system that intervened with the life and culture of the people of Kerala. In Alappuzha district, most of the sacred groves are owned by a family,

or group of families, and a very few number by Trusts or Devaswam boards. In Cherthala Taluk 97% of the SGs are owned by families, In Ambalappuzha taluk it is 93%, Karthikappaly taluk it is 94% Mavelikkara 90%, Chengannur 90% and in Kuttanad it is 72%. Therefore majority of the sacred groves in the district do not form part of temples and are associated with ancestral home

(Tharavad).

The peculiarity in the district is that the district support maximum number of SGs when compared to other districts, ie, more than 2200, whereas the area covered by each SG is comparatively less, except a few. Cherthala Taluk support maximum number, 877 but the total area under SG is only 129.3 Acres. There are only 4 SGs having area more than one acre. A remarkable observation on the

SGs of this taluk is that 90% of the SGs are having attached ponds, in certain cases 2 to 3 ponds. In most cases the so called SG is a patch of tree growth around the pond with a platform for lighting the lamp. On ecological grounds these small patches of tree growth may not be of much importance, but the ardent belief and commitment of the local people to preserve it in the name worship has to be acknowledged and therefore they are enlisted. Studies conducted by different agencies have also accounted these small patches as Sacred Groves.

In Mavelikkara taluk, there are 11 SGs having area more than one acre. In Karthikappally taluk, Mannarasala Nagaraja kshethram kavu(ALPY/Kply/ 95) spreads over 8 acres, lying in 11 bits. It is managed by a *Kudumba* trust. In Chengannur taluk, Elenjikkal Vallikavu Devikshethram kavu(ALPY/Cgnr/66) also extends to 8 acres, but is owned by Travancore Devaswam Board.

#### **The role of gender in sacred groves can be analyzed at four levels:**

- (a) The gender of the deity associated with the sacred groves;
- (b) The gender of the priests conducting poojas in the groves;
- (c) The nature and extent of access to men and women in various rituals, festivals and ceremonies in the groves, and harvest of biomass from the groves; and
- (d) The role of gender in the management of the sacred groves.

Regarding gender of deities, the male deities associated with the SGs in the district are:- Ayyappan, Sivan, Subramoniam, Krishnan, Ganapathy, moorthy, Sasthav, Paramasivan, Mahavishnu, Valyachan, Gurunadhan, Vettakorumakan etc. Bhadradevi,

*Durgabhagavathy, Bhadrakali, Saraswathi Devi, Parvathy, Bhuvaneswari, Vanadurga, Annaporneswari* etc are some of the female deities.

*Nagaraja, Nagayakshiamma, Karinagam, Maninagam, Krishna sarpam* etc are the snake deities. In certain cases there will be only *Chithrakoodam* where deities are only *sankalpam*. Many *Kavus* are dedicated to snake (*Serpant God*) alone. In Kayappurathu kavu (Pallipuram Village) (ALPY/Ctla/368) altogether 9 serpent gods are being worshipped, They are; *Karinagayakshi, Karinagam, Kuzhinagam, Nagarajav, Anjanamani nagam, Mani nagam, Nagayakshi and Para nagam*, Snake is also the associated deity in many other *Kavus*.

Regarding the gender of the priest, it appears that the priesthood rests with males without exception.

There are strict practices in the nature and extent of access to men and women in various rituals, festivals and ceremonies in the groves. Since majority of the SGs are attached to households, daily lighting of the lamp is done by usually women. At Elanjimel Vallikavu (ALPY/Cgnr/66 ) there are Thekekavu and Vadakekavu. In Vadakekavu women are not permitted to enter the Kavuv; even for men, during the pooja, they are not permitted to directly see the *prathishta*, they can worship only by standing outside the *sreekovil*, behind the closed door of the *sreekovil*.

Management of the SGs normally vests with men. In certain cases, as per records the owner may be a woman, but management is executed generally by men.

## **Worship**

The worship pattern varies from place to place and Kavuv to Kavuv. Except in exceptional cases, daily pooja is not practiced in the SGs.

Except a few, ownership of most of the *Kavus* vests with *Nampoothiry* (Brahmin) community. *Nair* and *Ezhava* communities also own a number of *Kavus*. A few *Kavus* belong to scheduled castes. Though the ownership is as mentioned above, poojas are mainly *brahmana pooja*. *Abrahminapoojas* are performed by *pulluvas* or other members belonging to the Scheduled Casts.

Since majority of SGs belong to families, worship patterns, rituals and festivals vary from place to place. Unlike in the case of SGs attached to major temples, expenses

on festivals would be very restricted because they themselves have to find out the resources for the festivals. In the family SGs, daily poojas are not taking place, instead

Naga Deities – Nalekattil Kavum

lighting lamp in the SGs by members of the family is uninterruptedly carried out. It represents unity and collective action of the family members. Poojas are either monthly or seasonal.

It is interesting to note that in certain cases poojas are conservation oriented. In Nalekattil Bhagavathy kavu (ALPY/Cgnr/35) during June, July and August (*Midhunam, Karkidakam and Chingam*) poojas are not conducted in the SG. The scientific reason behind this, it is said, is that snakes lay eggs during this period and therefore there should not be any disturbance to their multiplication.

Offerings & Rituals:- *Sarpa bali, Noorum palum, Dhara, Uruli kamazhthu* etc are some of the offerings performed in the SGs attached to temples. *Pambin kalam with pambin thullal or sarpam thullal (dance)* is another common form of ritual followed in majority of the SGs. *Pambin kalam*, an art work made in the ground with different colours and *thullal (dance)* by sitting on it is performed every month or during festive occasions. *Theeyat in Karkidakam, Thrrikarthika in Vrichikam and Harijan vela in Makaram* are certain other forms of rituals.

Astrology has an important role over rituals and offerings and preservation of the sacred grove. Astrologer decides the date of festivals *inkavus* where there is no fixed date. He declares the need for additional rituals *during* festivals. In certain cases Astrologers by their verdict becomes saviors of the kavu and in certain other cases they are alleged to be turning into a threat for the existence of sacred groves. In order to cut trees from sacred groves for financial benefits or to clear the land for construction purposes, the astrologer's advice is managed to get to conduct *punaprathishta* (shifting of the Kavum) now-a-days.

## Folk Arts

The art, culture and customs of the people of Alappuzha district are mostly the same as those of the people in other districts of central Kerala. The folk songs in

the fields during sowing and harvesting, the awakening songs by the Panans, and a few other dance forms of the traditional style associated with festivals like Onam can still be seen. A large number of art forms including folk dances, dramas, folk-songs, etc., have gone into oblivion. It is believed that Thullal propounded by Kunchan Nambiar had found its stage in the famous Ambalapuzha temple.

Alappuzha has only a small number of tribal populations. Their way of life and attire are far from the same of those of their counterparts residing in the tribal hamlets inside the forests. The small number of Ulladas settled in the district do not maintain their traditional tribal way of life, but they have become one with the rest of the society.

Kalamezhuthu, pattu, Pulluvan pattu, Thullal, Pambum thullal or Sarpam thullal, Velakkali, Padayani, etc are some of the folk art forms performed during the festivals in the SGs. In major temples, Ganamela, Bale, Drama, etc are performed during temple festivals.

The ritual of *Kalamezhuthu* develops through three stages - *Kalamezhuthu*, drawing of the picture, *Kalam Pattu*, which involves the rendering of the myth related to the deity to the accompaniment of some traditional instruments and *Kalam Thullal*, the final stage in

which the myth is performed in a stylized form following which the *Kalam* is erased. This art form is multi-dimensional in that it bears religious, aesthetic and social aspects.

*Kalamezhuthu* is a combination of two-dimensional and three-dimensional designs drawn with the colours black, white, green, yellow and red. What is unique is that the colours used are

natural products. Burnt husk of paddy is used for black colour, powdered turmeric for yellow and powdered leaves and *mylanchi* (henna) for green. These hues are further mixed to obtain more combinations.

The outline is drawn with powdered rice, which is also used to get white colour. The scale varies from five meters to three meters. The deity is drawn in bright colors and in a dark background. When the bell metal lamps placed on the four corners of the drawing are lighted what ensues is an enticing piece of art. These awe-inspiring depictions will lead one to the roots of the aesthetic traditions of Kerala.

Sarpam thullal is generally held to appease snake gods for prosperity of the family or to give an offspring to the couples who may have difficulties in conceiving a child. People generally take a vow is also associated with the ritual and Sarpam Thullal is done after the fulfillment or accomplishment of the vow. But in most of the scenarios Sarpam Thullal is done to ward off any doshas of the family and bring peace and prosperity.

The temple astrologer is the one who normally initiates the process or in certain places it is held as an annual or regular practice. Once the date is finalized by the family, the associated Pulluvan family with the temple is informed. It is the Pulluvan and Pulluvathy and their assistants who hold the skills and responsibility of creating the aesthetic requirements for the Sarpam Thullal.

The art forms of the Pulluvar are ritualistic. Most of their songs are related to worship, ritual, custom and exorcism. The pulluva art is expressed in the background of snake-worship. The pulluvar of Kerala are closely connected to the serpent worship. One group among these people consider the snake gods as their presiding deity and perform certain rituals such as sacrifices and song singing. This is called 'Pulluvan Pattu'.

## CHAPTER IX

### SOCIO-ECONOMIC-DIMENSIONS

The existence of sacred groves (SG) is governed by the attitude of stakeholders like custodians, devotees, employees and to some extent the pulluvans carrying out prayers for devotees & vendors who supply services in connection with the maintenance of SGs and related activities. The Socio-economic condition existing among the stakeholders depend on the local acceptance over the SGs and awareness of its influence on faith and environment. Compared to other districts in Kerala, Alappuzha district having smaller extent of geographical area, has considerable number of Sacred Groves which is likely to be the highest. In many family properties more than one sacred grove can be seen though they small in extent. The different SGs with small wooded area hold different deities. Apparently there is a strong belief among some custodians / believers that one deity does not tolerate another one in the same hold. Consequently it is noticed that in SG managed by Kayampurath Kudumba Trust at Pallipuram in Cherthala taluk there are nine small wooded sites to hold different deities. Similar is the case with Kulangara Illam Kavu in Kuttanad Taluk where there are nine bits of SGs. Again in the famous Mannarasala Temple Kavu at Harippad in Karthikappally taluk there are eight wooded sites.

The purpose of this chapter is to get a rough idea on the volume of employment and income generated in maintaining the SGs which ultimately flow for the improvement of economical status of people concerned. Based on the type of management in charge of these groves and the various nature of activities organised in each SG, all the sacred groves have been grouped under four different categories. Details regarding the number of persons engaged under different jobs, range of remuneration, expenses and income have been collected from some of the custodians or representative of the SGs. The data so collected refers to the minimum quantification as judged by the enumerators.

Income and expenditure generated from this set up varies considerably according to the quantum and quality of the rituals. Certain SGs have very elaborate activities relating to festivals associated with temples attached. Here the influx of devotees and income & expenditure are high. Adimoolam Vettikode Sree Nagarajaswami Kshetram is one

of the examples. There can be temples constructed as part of the SGs in order to manage the affairs financially viable. This kind of Sanskritization is fast developing in SGs which need large amount for maintenance and are less attended by devotees while the sacred grove is sufficiently large. In many of the instances many SGs owned privately, are maintained by the custodians within their means irrespective of local acceptance owing to their faith in the deity and fear of dispossessing it. This forms the major portion. Taking into consideration the above observations the 2242 sacred groves in Alappuzha district are categorised into five as below. One sacred grove by name Chemathukavu (Id. No 428- having 20 cents) in Karthikapally taluk is under revenue department where no pooja or rituals is taking place. Hence this is not included for this categorization. In addition there are some sacred groves where there is no worship even where idol is placed. Such SGs are high in Karthikapally taluk (36 nos.) and as low as two in Kuuttanadtaluk. In all there are 74 such SGs in this district. Thus including the Revenue Dept's one, these 75 SGs are out of the purview of this and the remaining 2167 SGs are subjected to this estimation. The estimation of money flow is only a rough calculation to get an idea about its vastness and cannot be taken as an authentic figure. By interviewing some of the people in charge of typical SGs of different categories this figure is arrived at. This team recorded the details as they also found it reasonable and possibility of any exaggeration is avoided. FOLLOWING ARE THE CATEGORIES.

- A. Under Devaswam Board. 44
- B. Under Trusts and Local committees, -93
- C. Privately owned with temples attached. 384
- D. Owned by individual families- 1674.
- E. Special Cases..2, Vettikkode and Mannarasala Sacred Groves.

**A. Category- SGs under Devaswam Board.**

Pallipuram Sri Bhadrakali Temple Kavu

In this case devotees are regularly visiting the kavu and every day lamps are lit with at least one pooja per day. Every month Aayilya pooja and Nurumpalum are performed. In addition there will be one or the other ceremonies in all religiously designated days. A committee will be

in position to organise all the functions. An example to be mentioned is the – “VettikotPallipuramSreeBhadrakaly Devi Kshetramkavu”. This is situated in MavelikkaraTaluk. The extent is very large.

In another instance one family has donated a sacred grove lying in two bits to SreeKannamangalam Mahadeva kshetram in Kannamangalam village of Mavelikkara taluk with a pond in between the bits hosting plenty of tortoise. Since all these conditions such as income, expenditure and employment are generated due to the combined role of both Temple and SG, only 10 % of these components are earmarked to the credit of sacred groves. In a representative case taken as average, the estimation is as below-.

#### A - 44 N0s.

Statement of employment and Income.

Amount in Rupees

Category	Number	Mandays/year	eXPENDITURE	Income	Remarks
Priest	2	730	3,60,000		15,000/pm
Assistant	2	730	2,40,000		10,000/pm
Helper	3	1095	1,80,000		5000/pm
Total		2555	7,80,000		
Maintenance cost			3,60,000		30000/pm
Festival cost			18,00,000		
Total /year		Expenditure	29,40,000	35,00,000.	Rounded off by giving space for offerings.
Hotels & Shops	2	730	2,19,000	3,00,000	3600/pm wages
vendors	5	10 days-50	15,000	1,00,000	Remuneration-300/day

					Income- 1000/day
	<b>14</b>	<b>3335</b>	<b>3174000</b>	<b>39,00,000</b>	
	To the Credit of Sacred Groves				
<b>To the credit of SG- 10%</b>					
		<b>333.</b>	<b>3,17,400</b>	<b>3,90,000.</b>	

**Note-**

In respect of sacred groves attached to temples of Travancore Devaswam Board no separate arrangement or expenditure is made for managing the affairs of these kavus. The remuneration given is only the minimum and all the employees get some amount by way of *Dakshina*. The same priest and supporters do attend for the functions in the kavu.. There will be nominal expenditure involved. Income is also same. Hence only 10% of the values under the different parameters have been taken in the statement to the credit of SGs as stated.

As regards the income, a clear picture cannot be accessed. However for the rough calculation total expenditure is taken as the minimum income.

**Shops & Vendors**

There are quite a number of shops are run to meet the requirement of temples and devotees

besides the vendors. Since many such temples provide free lunch or *Annadanam* , the business

for hotels is limited. At an average one hotel and two shops for stationery are estimated.

## **B Category-93 nos.**

### **.SGs under Trust & Local Committees.**

Public Trust or Public Committees are formed to manage SGs which are well attended by devotees while at the same time the owner of the property is not well equipped to manage the affairs to cop up with the local demand. In such cases Public Trust formed by devotees

or Local Committees come up to manage the affairs. The NSS (Nair Service Society) karayogam also take up such cases sometimes. In most of these cases a temple is also attached to the SG. Here the presiding deity in the kavu is given equal importance WHILE taking decisions on programmes regarding rituals. There will be daily pooja, monthly special pooja

followed by three to five days festivals in the SG. The deity in the SG is mostly Nagaraja while the temple houses other Gods. Occasionally lectures on religious topics and variety entertainments are arranged. All these are financially supported by donations from public, sponsorship by rich persons and offerings from devotees. More people are engaged to attend and control these activities. As some kind of activity is always there one or two vendors also find their occupation. Regular shops also come up depending on the flow of local visitors. The Nallathrakavu in Veliyanad Village in Kuttanad taluk and Koikkalkavu attached to Sree Subramanya temple in Vayalar village of Cherthala Taluk are examples. A large sacred grove Charamangalam Kailas, under Public Committee having 1.5 Acres in extent in Kanjikuzhy village of Cherthala taluk is another example. Picture is shown below.

The income and expenditure position in a typical average case is estimated as below.

Statement of employment and Income.

Amount in Rupees.

Category	Number	Mandays/year	Remuneration	Income	Remarks
Priest	1	365	1,20,000		10,000/pm
Assistant	1	365	60,000		5000/pm
Helper	1	365	36,000		3000/pm
<b>Man days</b>		<b>1095</b>	<b>2,16,000</b>		
Maintenance cost			1,50,000		
Festival cost			3,00,000		
<b>Income</b>				<b>7,00,000</b>	
<b>Shops</b>	<b>2</b>	<b>730</b>	<b>219000</b>	<b>3,00,000</b>	300/day wages
<b>vendors</b>	<b>3 x 10days</b>	<b>30</b>	<b>9000</b>	<b>25,500</b>	do
		<b>760</b>	<b>2,28,000</b>	<b>3,25,500</b>	
		<b>1855</b>	<b>8.94</b>	<b>10.25</b>	

### C Category- 384 nos.

Privately owned with temples attached. 384 Nos.

Sacred groves owned by well to do people either form family trust or maintain it on their own with temples attached. The families of the Tharawad join together and run the affairs of the kavu. An example is Oanampilikavu( Id. No 128 ) in Thekkekara village of Mavelikkarataluk. The extent is 131 cents. As much as 11 families join and formed a family trust to manage the sacred grove . There are around 1000 members in all.

In another case one individual family hailing from a very old ancestral origin shifted and settled in Chengannur and this family is managing an SG -NalekattilKavu .They came here more than three hundred years ago from Thinnaveli and the SG and temple are right inside the premises of their residence.

Another case is that of UnnikaliKavu shown below. Such temples do promise further protection of the vegetation in the SG. Income and expenditure will be more or less the same as in the case of trusts. There is not much stress on public donations and the members of the families contribute considerably to make it a break even affair.

## Statement of employment and Income.

Amount in Rupees

Category	Number	Mandays/year	Remuneration	Income	Remarks
Priest	1	365	96,000		8000/ pm
Assistant	1	365	36,000		3000/pm
Helper	1	365	24,000		2000/pm
Total		<b>1095</b>	<b>1,56,000</b>		
Maintenance cost			1,25,000		
Festival cost			200,000		
Income				<b>5,00,000</b>	
Shops	2	730	2,19,000	3,00,000	
Vendors	3 /10 days	30	9000	25,000	
		1855	7.09	8.25	

Note-The shops and vendors are more or less the same as above.

**D.Category- 1673 nos.**

D.SGs owned by individuals 1674 Nos.

Many of the SGs owned by individuals come under this category. The intention of holding the sacred grove within their property is mainly governed by their desire to venerate the serpent god due to faith. They do not entertain any kind of donation. They allow others to visit the kavu and submit offerings which would be appropriated in the manner useful to the benefit of the society. The typical cases are in Cherthala taluk. The extent of SG is small. But they maintain them with in their own resources without expecting any financial assistance from out side. The following SGs are examples.

Hen this

When this category is examined, Kuttanad taluk comes in the mind of the enumerators. Though the total number of SGs are only 65 majority of them follow the same pattern. They themselves conduct pooja, light lamps every day or occasionally ,conduct poojas weekly or monthly or even once a year. But protection

of the sacred grove is the main concern however small it is. Similar cases are plenty in Cherthala and to a small extent in the other taluks. Statement of employment and Income.

Category	Number	Mandays/year	Remuneration/year	Income/ Yr	Remarks
Priest	1	12	12,000		1000/ pm
Assistant					
Helper	1	12	6,000		500/pm
Total		<b>24</b>	<b>18,000</b>		
Maintenance cost					
Festival cost			10,000		
Income			28000	<b>35,000</b>	

Amount in Rupees The role of shops and venders is negligible.

The role of shops and venders is negligible.

### E.SPECIAL CASES.

Vettikkot main Naga Temple

The famous MannarasalaKavu and Vettikkatukavu are the two sacred groves principally dedicated to Naga deity with temples coming within Alappuzha district. Considering the influx of devotees visiting and the elaborate and expensive rituals taking place in these two temple kavus no other sacred grove

comes up for comparison. Hence it is felt necessary to project these cases separately for calculating socio economic condition as these do not fit in with the average at any rate.

## CHAPTER X

### MYTH AND LEGENDS

A myth is a story, based on traditional knowledge passed on to generations, which people are inclined to believe depending on their attitude to the subject matter. Although some myths can be accounts of factual events, they have become transformed by symbolic meanings. Myths or stories about sacred groves would be fascinating or even frightening.

A legend is a semi true story, which has been passed on from person to person and has important meaning or symbolism for the culture in which it originates. A legend usually includes an element of truth, or is based on historical facts, but with mythical qualities.

#### *Myths*

Here are some of the myths, prevalent among the devotees of sacred groves. A mythological origin of sacred grove is attributed to serpent worship. Lord Parasurama created the land Kerala and brought Brahmins from northern part as colonists. As they found the land not inhabitable they abandoned the land and returned to old place. Later the Nags ( Serpant worshipers) who were considered belonging to lower world took possession of the newly reclaimed land. The runaway colonists returned only to find that the land was usurped by Nagas (serpents). The fight ensued was arbitrated by Lord Parasurama and he prevailed upon the colonists to set apart a corner of every occupied compound to the abode of serpent God.—Hence the origin of Kavu-Sacred Grove.

According to earlier dictum of Lord Parasurama, the southwest corner of every taravad has to be protected with a parapet wall with atleast a chitrakootam for keeping up its sanctity and serenity. As a rule, certain tree species such as Ezhilampala, (Saitan-wood) , Tanni , Arayal, Ayani, Thambakom, Elanji, Vellapine besides rattan and thick shrubs were prescribed to be retained or grown.

In Alappuzha district, the above statements on myth are very relevant by virtue of the existing land mass with sandy soil and sparingly occurrence of mangrove species and the numerous SGs taking positions in most of the compounds consolidated by deep faith of the people in worshipping Naga. This situation holds true in the whole of Alappuzha district barring Kuttanadtaluk.( Source-Travancore Manual and “Keralolpathi”).

### Legends-

Keeping on the statements on mythology relating to sacred groves behind our mind it is interesting and informative to go through the legends connected with some of the sacred groves like those in MannarasalaKavu in Karthikapally taluk and VettikkoteKavu in Mavelikkara taluk. Though Mannarasala is much more well known, according to legend Vettikote Temple Kavu takes an earlier position. There are eight prominent Nagarajas of which two are mainly worshipped namely, SreeAnandan by Vaishnavites and Sree Vasuki by Saivites.

#### 1-Sree (Adimoolam )Nagaraja (SreeAnantan ) Temple Vettikkot,

It is believed that Sri Anantan (Adisesha) is the seat of Lord Vishnu. The idol of SreeNagaraja was given to Lord Parasurama by Sri Anantanhimself .Lord Parasurama,being an incarnation (Avathar) of Lord Vishnu first consecrated SreeAnantan in the newly acquired land at Vettikkot. This idol was installed by Lord Parasurama by hoeing and heaping the mud ( vetti-

kottuka ) at the

Presentplace and this place got the name Vettikkot.At the time of consecration of SreeNagaraja idol with sankalpa of SreeAnantan Lord Parasuram directed that Nagas will have full right over one- eighth of the land.

This temple isbeing owned and managed by members of MappallilIllam who were descendants of the old Paradesi Brahmins brought by Lord Parasuram for settling in the newly created land -Kerala.There are three branches of the Illam and they are involved in the administration of the temple in rotation of one year

basis. This Sacred Grove has in all 7 acres with four acres under wooded area. There are four tanks also.

## **2-Sree Nagaraja-Sarpayakshi Temple, Mannarasala,,Harippad.**

A pious Namboothiri of Eringatappalli Illam long ago migrated to this place (Harippad) from Iringalakuda. A member of this Illam married a girl of the Vettikkottu Illam where serpents were held in great veneration. As the parents of the girl were poor, they could give only a stone idol of the serpent as dowry. The girl was enjoined to worship the idol regularly. This couple - Vasudeva and Sridevi - had the grief of childlessness. One day fire broke out in the jungle where the serpent idol was consecrated

and by the hot flames many serpents and snake were charred . Even some of them could

not crawl. The couple prepared a mixture of ghee and honey and poured over these serpents besides applying sandal paste . Their timely action of pouring water was effective and the soil (mannu) became cool ( Aari). Thus the area (Sala) came to be known as Mannarasala. Sree Ananta -the Naga king appeared before the couple , blessed them and told that He himself would incarnate

as son of the couple as a five-hooded serpent child , besides another child in human form. ( V.NagamAiya)

The girl became pregnant and gave birth to a male child and a serpent. The snake child was kept in the underground cellar of the house. The Illam prospered from that day. The woman and the snake are believed to be the cause of the affluence of the family. The serpent child took the cellar (nilavara) as His abode. Both sons were born on Ayilyam asterisk in the month of Kumbham and hence this day has become important for the temple. As per the dictum poojas are to be performed by Antarjanam (called SreeValiyamma) who has to lead a life of celibacy and to relinquish all worldly pleasures. This system which started over a millennium has withstood the time effectively. Thus Mannarasala Naga temple has become very popular

visited by thousands of devotees. This temple owns 15 acres of land supporting sacred groves in different bits and associated constructions.

### **3-Sri Thiruvairoor Mahadeva Temple Kavu-Chunakkara.**

This SG dates back to the ninth century. This was originally a thick jungle with tall trees. Once an agricultural woman went there for collecting fodder. She happened to sharpen the sickle over a big granite stone. Suddenly blood oozed out from it. She reported this to local people. Hearing this the local chieftains decided to have a prasna which revealed that the sila { rock) had immaculate powers of Lord Mahadeva.

Once AyiroorThampuran visited Mavelikkara in 18<sup>th</sup> century at the invitation of Kayamkulam Raja. He was seen sitting under a Marotti tree (Hydnocarpus pentandra). As per his routine Thampuran would take dinner only after worshipping in a temple dedicated to Lord Siva. He was sitting there as he could not locate a Shrine of Lord Siva in the vicinity. Seeing this dignified person sitting under a tree, one Karanavar took him to this temple. This being a Swayambhoo idol, Thampuran could experience the powers of Mahadeva at the first sight itself. Thampuran conveyed his experience to Kayamkulam Raja and at the instance of Thampuran, Kayamkulam Raja got himself involved in renovating this temple and the temple is known as Sri. Thiruvairoor Mahadeva Temple and hence the fame goes to this SG also.

### **4-Mathur Temple Kavu in Kuttanad.- Id. Ku-17**

This temple dates back to the 16<sup>th</sup> century during the existence of princely state namely Chembakasery. Ambalapuzha of today is the erstwhile Chempaksserydynasty. In the history of Chempakassery, Mathur Family had a leading role in providing defence through their set of Nair Battalions. The head of the family was known as Mathur Panickers.

#### **A)- Origin of Mathur temple-**

This temple with sacred grove is situated in Nedumudi Village of Ambalapuzha Taluk. Two panickers- Mathur Panikker and Puthiyottu Panikker were deputed to a place in Mangalore to learn weapon training and Kalari (Martial art). The latter underwent the training with a strenuous effort before returning. The other was lazy and was mostly engaged in assisting the

*Antharjanum* in house hold affairs. While returning he felt very sad in not gaining any useful lesson and he complained to the *Antharganum*. She felt sympathy for him and gifted him an idol of Sri. Bhagavathy which they were worshipping so far. This was done without the knowledge of

her husband. She advised the Paniker to worship the Idol and get prosperous in all respects. On the way these two had to confront an attack from some dacoits, but could win over them. . They believed that this victory was solely due to the possession of the idol.

The Acharyan-Guru of Mangalore returned home to see that the idol of Devi was gifted, he lost no time to rush to Chempakaserry -Mathur family to restore the Idol.By that time the

Panickers had consecrated the idol in the Kavu. Acharyan's efforts to remove it through normal ritualistic efforts failed and he finally compromised with the situation. The anti-climax set in when he moved down to Mathur and settled in a nearby illam and established a Kalary.Thus Mathur Templekavu came into being.

(refer- Works by Malayalam literary person SahithyaPanchanan-P.K.Narayana Menon.)

#### **B)- Famous Satirist Kunchan Nambiar & Mathur Kavu.**

During the 18<sup>th</sup> Century, the famous poet and Satirist MahakaviKunjan Nambiarhad developed most of his activities ( mainly Ottamthullal) spending his time in this sacred grove cum temple.He had close association with Mathur Panickers . In a book published by name-Mathur-Kattur Kudumba Charithram-by Prof.N.R.Panicker it is stated that the Mathur Kalari and temple formed the main basis for Kunjan Nambiar to develop and propagate his OTTAMTHULLAL- a satire comedy. The kalithattu (Wooden plat form with roof) where he used to spend most of his time working on his mission, is still protected.-as seen in this picture.

#### **5-Thalavedy kavu -Kuttanad- Id. Ku-62.Ambalapuzha Pal Payasam.**

This SG was once a resting place of Chembakassery Raja. When ever he visits the temple there, in honour of him there used to be a fire cracker and this is styled as Thalavedy. Hence the name of the SG is known as Thalavedykavu. The Raja used to visit the Kavu for relaxation by playing chess and also for Ayurvedic treatment of health rejuvenation.The custodians of this SG were those hailing from a community- Bhattathiripad-which was considered in those times as a higher

group. During 18<sup>th</sup> Century there was large scale crop failure due to insect attack and poor agriculturists suffered a lot. In order to mitigate the situation the Raja, by virtue of his association with the Bhattathiripad requested to give 5000 units (para) of paddy for the poor to be paid back with interest later. Much earlier these group of people were given possession of land by Raja. Though the Raja could overcome the dilemma, he was not able to clear the debt on account of subsequent crop failures. Later the Bhattathiripad chose to press for repayment of paddy with interest. As an extreme step he objected Raja entering Ambalapuzha Temple before clearing the debt. Raja was stunned.

Immediately this came to the notice of Parayil Menon who was an opponent of the Bhattathiripad, arranged to deliver in loads 36000 units of paddy including interest there. Bhattathiripad received a counter shock. He was directed to take and remove the paddy stock immediately before next religious ritual commence. He was helpless. He donated the whole paddy to temple. This stock was taken to temple asset and from the interest accrued from it Pal Payasam started being served to devotees.

#### **6-Ettonnil Kav. No. Id /14 of Kuttanad.**

This is a small SG in Kunnumma village of Kuttanadtaluk. The importance is that it belongs to the family of one of the Ettuveetil Pillamars. These pillamars once ruled eight regions in erstwhile Travancore. Later they were declared as traitors during the rule of King Marthandavarma in the 18<sup>th</sup> century. The SG takes its name after their name. This SG of 5 cents in extent, is being looked after by the descendants of one of the Pillamars. They carry out regular worship. According to them, though life is not very comfortable in that locality, they are just maintaining it in view of its historical importance.

#### **7-Ezhumanasseril Yakshiyamma Kshetrakav. No. Id. 647 of Cherthala.**

This has an extent of 20 cents. In Thanneermukkam North Village. Originally this was owned by Brahmins. A lady who was working as a sweeper in the SG delivered out of the priest. The incident antagonised the Brahmins who discarded the priest and after that they themselves left the place. The lady and the child became legal heirs of the Kav. Now it is being managed by local people including members from Muslim Community.

### 8-Itty Achudan kavu-Id-479, Cherthala Village

As the name indicates this SG was owned by the family of Itty Achudan who was one of the major contributors in the compilation of world famous Botanical Treatise - Hortus Malabaricus by Dutch Governor of Malabar Hendrik Van

Rheede in 17<sup>th</sup> Century. Itty Achudan is reported to have maintained a large wooded area and now it has shrunk to this level. However the descendants protect this and do the lighting lamp rituals. Visitors do come up here. There is a small memorial installed for Itty Achudan.

### 9. Killikatkavu-Kalavoor village- No.Id-42 Ambalapuzha.

In the premises of this SG a Coconut Palm planted close to the sanctum sanctorum is yielding nuts in a peculiar shape. The husk comes up in the shape of serpent hood. Devotees attribute this peculiarity to divine power and worship the palm also.

### 10. Wafting Cock for curing disease.

In Kannettuchira kavu ( Id- Chrt-78 ) in Perumbalam village of Cherthala taluk, there exist a belief that illness of children can be cured by praying and performing an offering to the presiding deity Nagaraja. There is a platform with a large vessel in which pure water is poured. The Thumba plant with panicle ( *Leucas aspera* ) is dipped in the water. Then the child having illness is brought and get the child bathed in this water. Further when the child gets cured people concerned bring a cock and offer it to the sacred grove. The cock is wafted – (slowly released in the air there by making it fly). This is performed as a function while large number of people gather to witness.

## CHAPTER XI

### THREATS& RECOMMENDATIONS

There are various factors that pose a threat to the survival of some of the SGs. They fall under the following categories.

1. Partition of family property
2. Legal issues
3. Inability to maintain SGs
4. Dumping solid waste in the SGs.
5. Damage by invasive species.

#### **1. Partition of family property..**

Reduction in extent of sacred groves take place due to- i) Total disregard and partition of family property among family members having different attitude towards setting apart large areas under SG or ii)-reducing the number of groves within the same family property or iii) Legal issues or iv)-lack of financial support for maintenance .This is very evident in Kuttanad taluk. Recently considerable development has taken place in respect of construction of roads in such a way that many spots which were accessible only by boats are easily approached by road. Consequently the land value has risen and this fact can be one of the reasons for the reduction of area under sacred groves. Such cases are noticed in some villages in this district though not in an alarming rate. Some of the typical cases narrated below may throw some light on these aspects.

Lack of interest in maintaining the SG.

i-Erumathara kavu, Id.no.2 Kuttanad.

The extent is only one cent which has reached the hands of the present owner by way of partition of family property. It is seen that all trees have felled from this small area at the instance of the owner. But the idol is still there and it is being worshipped by the local people. It is not known how long this would continue as a grove with idol and without trees.

ii-In the SG, ValedathumadomIllam in Cherthala taluk the owner is planning to fell the trees . The fate of this can be easily predicted.

Moolamkuzhikavu Id.no.5 Kuttanad.3 cents.

Here there is a belief among some people in kuttanad area, that they can clear the vegetation leaving one or two small trees , consecrate a Naga idol and carryout the worshipping rituals. Same thing is noticed in Ettonnilkavu Id no.14 kuttanadalso.The extent is 5 cents.This SG is stated to have been owned by historically famous “EttuveetilPillamar” of Travancore.

Reducing the number of SGs within the family.

It is very common in Alappuzha district that many families maintain more than one SG within the residential premises. They may be very small in extent having one or two trees.At the same time under the tree there is an idol of Nagaraja.The present generation want to combine all such bits. There is a system of invoking the deities and consecrating them at one place. This process is administered by specialised priests who charge very heavily.Many poor (BPL-category) families are not able to raise his huge amount of around Rs.fifty thousand as could be seen in Mannanthrakavu in Cherthala taluk. Rich people adopt this system.

### **Legal issues.**

Moothedathukavu Id. No. 15 -kuttanad-5cents -Neelamperoor village.

This is in possession of oneSmt. PonnammaKumaran.Her husband passed away.They haveabout 7 acres of land most of which are paddy field. There are two small bits as SGs. In one bit there was a temple and the pooja ritual was entrusted with a Brahmin priest. Later the temple and kavu have gone into the possession of the priest and his associates. The lady has no authentic records with her to prove her ownership over this one bit and adjoining paddy field. A case is pending trial in the court and she is getting some support from local people. There are only very few trees in the encroached bit.

In Mavelikkara taluk there is onegrove which was once owned by KayamkulamRaja.The lease period is over and Revenue department took possession of the SG and entrusted it to a local person who is claiming as the legal heir. However the matter is pending with the revenue department.

Inability to maintain-

In quite a number of cases the custodians are unable to maintain the SGs owned by families either due to financial instability or due to absence of members to support. This is seen more in Kuttanad taluk. At the same time none of them like to part with the pooja of idol installed by ancestors due to fear or faith or both. In such cases many of them resort to entrusting the SG to other organizations as NSS Karayogam. The following are noticed in kuttanad taluk . ,

- i- Thekkettill kavu-Id.no.23—15cents NSS Trust-Chambakulam village
- ii- Padipurackalkavu( part of Devikshetram) -Id.24- 5 cents, private owner given this to Kuttanad NSS Taluk Union
- iii- Nalluthra kavu-Id.no.29 15 cents, this was public property given to NSS for management.Since there is no income , NSS handed over the management to local people.
- iv- ThaladadyManantharaSubramanya kavu-Id.no.59- This was given by the Mannanthara family to NSS karayogam and they formed a trust to manage this.

### **KulangaraIllumkavu**

The following is an instance of clearing SG after retaining a small extent of about 5-7 cents with Nagaraja Idol. Originally this SG had an extent of 9 acres. There are nine SGs

lying scattered with the same family and the total area is claimed to be 90 cents. Now during the time this team visited most part of the kavu was in the process of being cleared as they wanted to cultivate plantain for income generation.

Another reason offered by the custodian on this

clearing is that his request submitted to Social Forestry wing at Alappuzha was not fruitful. All these facts clearly reveal the financial crisis the owners are confronting a threat to the existence of the SGs. This particular kavu is shown below. This is

KulangaraIllamKavu -Id. No.11 of Pulimkunnu village in Kuttanad.Vegetation being cleared.

Earlier there were even 48 varieties of Mango trees.Financial stringency is the reason attributed,

### **OFF the beaten track-**

So far various cases where sacred groves are being threatened of their existence have described. Apart from these there are instances wherein SGs with reasonable extent with thick vegetation are facing an unpredictable and untimely disappearance in spite of holding thick vegetation. An example to cite is the Aayamkudikavu in Kavalamvillage.( Id. No.7 of Kuttanad) which has 1.5 acres in extent. This is surrounded on three sides by paddy fields. This supports thick vegetation and form an abode of various fauna like reptiles, birds like bats, flycatchers, rodents and functioning as a typical sacred grove from the point of view of biological conservation .But the inhibiting factors are absence of any idol worship and enforcing absolute prohibition to entry by others.A view of this sacred grove is given in pages dealing with ecology.

On contacting the person possessing this large extent states that they are interested in keeping the vegetation and kavu as it is since this was a gift from their ancestors. His family is having more than six acres of other land to make them live happily. As regards the absence He is waiting for better times instead of entertaining any idea of destroying the vegetation. He even expressed his desire to entrust this kavu to any organisation or

committee which can convince him that the area would be kept protected safely performing the functions of a sacred grove in the strictest sense.

Another case with similar condition is the Mozhursarpakavu in Cheppad village of Karthikappally taluk .Id. no.187.The residence andthe kavu behind can be seen in

this picture . The 10 cents kavu is being protected by them and the picture very well illustrates the attitude of the custodian, a retired army personnel. But they have no proposal for the future except maintaining these for the future generation though the

family is not that rich. But how long ? A question the Authorities on Biodiversity Conservation have to address.

### **Invasive species-**

A number of climbers such as, *Calycopteris floribunda*, *Cissus repens*, *Acacia intsia*, *Asparagus* sp. etc. pose a threat to the regeneration of the important plants. Studies are required to advise the custodians in reducing the adverse effect without disturbing the original status of vegetation.

## **Recommendations**

### **1. Separate project for Central Assistance to Sacred Groves.**

Financial grant for maintenance of sacred groves received from Government of India is being distributed to the custodians of sacred groves. The present allotment is naturally very low when compared to the actual number of SGs in Kerala. According to the recorded information with Government (refer. website on sacred groves ) the total number is 1500. By now with the results coming out of IFK's study, it is evident that the number is much more. Moreover forest department had no authentic data on the total extent of vegetation under SGs in the state except those recorded in four districts by IFK.. It is high time that KFD has to come out with detailed proposals for central grant to the custodians who have been protecting these natural patches rendering valuable and intangible contribution to bio-diversity.

### **2. Awareness Campaign.**

Social Forestry wing or Bio-diversity wing of KFD should consider planning awareness programmes in conservation of sacred groves for the benefit of the public & Custodians of sacred groves particularly regarding hygiene of the grove and premises. Present status and importance of sacred groves should be one in the agenda for extension activities targeted on students.

The Social Forestry wing may consider production of rare seedlings of plants which represent the relics of vegetation in sacred groves.

### **3. Production of quality seedlings of plants.**

Social forestry wing may also consider producing quality seedlings of species which are essential trees and other plants as would be emerged from this report.

### **4. Dealing with invasive species.**

This is posing a major threat to the existence of sacred groves. Removal and preventing further growth of invasive species is very essential. But the methods to bring about this task without affecting the general structure and ritual concepts have to be designed by a team of forest officials and scientists conversant with this issue may be ideal.

### **5. Ensure fair distribution of grant-**

When grants are distributed to SGs, it has to be ensured that the process is made as fair as possible by verification by a superior. Details if any required can be gathered from IFK in districts where field study has been completed. Poorly maintained SGs if any may be considered only if improvement is ensured.

### **6. Publicity for data collected.**

In order to bring the Id numbers of the sacred groves to the notice of all custodians concerned, department may take action for publicity in the press and social media.

### **7. Research studies.**

The following studies by Research Organizations may be considered.

- i. Natural regeneration of various plants in SGs.
- ii. Role of fauna like termites, bats, and many frequenting birds.
- iii. Identifying keystone species.
- iv. Detailed study on soils in Sacred Groves.

**8 . Sharing Data.**

The knowledge gained in carrying out studies on sacred groves may have to be shared with other related organizations within and outside the Forest Department including Biodiversity Board, Department of Science and Technology and other stake holders since such information is required for the benefit of the people as a whole.

**9. Recognition on contribution for Carbon Sequestration.**

Above all it is necessary to recognize the service of the custodians in the appropriate manner and give them enough encouragement for the valuable amount of carbon sequestration being contributed by them in some form or other.

**10. Intervention by Government to be cautious..**

The sacred groves are being well protected and conserved in general by the custodians without any legal enforcement. Therefore any intervention in the affairs of these sites by Forest Department or Government need to be planned and designed with caution not to disturb the freedom of custodians as it is a sensitive issue.
